By following the guidelines in *Disability Management*, any business can achieve these far-reaching results: full compliance with the ADA and other legislation, a healthier, more productive and more diverse workforce, reduced costs for medical care, disability benefits and workers compensation, fewer absences and workplace disruptions when disability strikes, enhanced employee morale based on increased opportunity and a better competitive position in a global economy.

College and University Disability Management, 1996. *Disabilities: Responses: practice, legal, and political frameworks* Catherine A. Marshall, 2009. In these unprecedented volumes, authors from around the world spotlight the latest knowledge on disability, including the social, legal and political issues that come to bear on people with disability. These authors are researchers, practitioners, people with disability and family members. Through their experiences, they share with us the nature of disability, the challenges people with disabilities face, approaches to disability around the world and promising efforts for rehabilitation that are on the horizon. We also learn in these volumes about social actions that have advanced human rights for people with disabilities in countries around the world. Yet we learn that in these same countries, discriminatory actions against people with disabilities continue to occur. The impact of different cultural beliefs about disability are explored and these beliefs are juxtaposed against legislative responses. In all three volumes, people with disabilities share their personal narratives about events they have faced in society. They provide rich examples of how culture, social interactions and legislation can impact on people.
