   Computational Conformal Mapping Prem Kythe,2012-12-06 This book evolved out of a graduate course given at the University of New Orleans in 1997 The class consisted of students from applied mathematics andengineering TheyhadthebackgroundofatleastafirstcourseincomplexanalysiswithemphasisonconformalmappingandSchwarz Christoffeltrans formation a firstcourse in numerical analysis and good to excellent working knowledgeofMathematica withadditionalknowledgeofsomeprogramming languages Sincetheclasshad nobackground inIntegralEquations thechap tersinvolvingintegralequationformulations werenotcoveredindetail except for Symm s integral equation which appealed to a subsetofstudents who had some training in boundary element methods Mathematica was mostly used for computations In fact it simplified numerical integration and other oper ations very significantly which would have otherwise involved programming inFortran C orotherlanguageofchoice ifclassical numericalmethods were attempted Overview Exact solutions of boundary value problems for simple regions such as cir cles squares or annuli can be determined with relative ease even where the boundaryconditionsarerathercomplicated Green sfunctionsforsuchsimple regions are known However for regions with complex structure the solution ofa boundary value problem often becomes more difficult even for a simple problemsuchastheDirichletproblem Oneapproachtosolvingthesedifficult problems is to conformally transform a given multiply connected region onto Mathematica is a registered trade mark of Wolfram Research Inc ix x PREFACE simpler canonical regions This will however result in change not only in the region and the associated boundary conditions but also in the governing differential equation As compared to the simply connected regions confor mal mapping ofmultiply connected regions suffers from severe limitations one of which is the fact that equal connectivity ofregions is not a sufficient condition to effect a reciprocally connected map ofone region onto another   **Computational Conformal Mapping** Prem K.
