## **Computer Media And Communication A Reader:**

*Computer Media and Communication* Paul A. Mayer, 1999 *Computer Media and Communication A Reader* is a collection of key texts selected for their significance to thought about computers as media. The book is divided into two parts. The chapters in the first part offer a chronological overview of how thinking about computers as a means of communication developed while the second part offers far reaching analyses of the implications of computer media for culture and society while highlighting significant directions of current research. The book not only provides an insight into how thinking about computers as media has developed but also is an excellent guide for students and others interested in the field of media and communication studies. This book is the first in the Oxford Readers in Media and Communication series under the General Editorship of Professors Brian Winston and Everette Dennis which will be an authoritative wide ranging series of readings for media students. There are more than eighty institutions in the UK offering courses in the field at present and in the USA this number is ten times as great.

**A Handbook of Media and Communication Research** Klaus Bruhn Jensen, 2013-03-01 *A Handbook of Media and Communication Research* presents qualitative as well as quantitative approaches to the study of media and communication integrating perspectives from both the social sciences and the humanities. Taking methodology as a strategic level of analysis that joins practical concerns with theoretical issues the Handbook offers a comprehensive and in depth review of the field and a set of guidelines for how to think about plan and carry out media and communication studies in different social and cultural contexts. The second edition has been thoroughly updated with reference to the development of the internet mobile and other digital media. Each chapter addresses shifting configurations of established media organizations media discourses and media users in networked practices of communication. The introduction and one further chapter probe changing conceptions on mass and interpersonal online and offline communication in research as in everyday life. Three new chapters have been added to exemplify different forms of research employing multiple methods to study multiple media in multiple contexts.
