Digital Places

Maurice Vincent Wilkes

Digital Places:

Digital Places Michael Curry, 2008-01-28 By offering an understanding of Geographic Information Systems within the social economic legal political and ethical contexts within which they exist the author shows that there are substantial limits to their ability to represent the very objects and relationships people and places that many believe to be most important Focusing on the ramifications of GIS usage Digital Places shows that they are associated with far reaching changes in the institutions in which they exist and in the lives of those they touch In the end they call for a complete rethinking of basic ideas like privacy and intellectual property and the nature of scientific practice that have underpinned public life for the last one hundred years

Living in Information Jorge Arango, 2018-06-15 Websites and apps are places where critical parts of our lives happen We shop bank learn gossip and select our leaders there But many of these places weren't intended to support these activities Instead they're designed to capture your attention and sell it to the highest bidder Living in Information draws upon architecture as a way to design information environments that serve our humanity

Making the Digital City Alessandro Aurigi, 2005 Since the late 1990s Information and Communication Technologies ICTs have been hailed as a potentially revolutionary feature of the planning and management of Western cities Economic regeneration and place promotion strategies have exploited these new technologies city management has experimented with electronically distributed services and participation in public life and democratic decision making processes can be made more flexible by the use of ICTs All of these technological initiatives have often been presented and accessed via an urban front end information site known as digital city or city network Illustrated by a range of European case studies this volume examines the social political and management issues and potential problems in the establishment of an electronic layer of information and services in cities The book provides a better understanding of the direction European cities are going towards in the implementation of ICTs

Doing Digital Migration Studies Koen Leurs, Sandra Ponzanesi, 2025-10-01 Doing Digital Migration present a comprehensive entry point to the variety of theoretical debates methodological interventions political discussions and ethical debates around migrant forms of belonging as articulated through digital practices Digital technologies impact upon everyday migrant lives while vice versa migrants play a key role in technological developments be it when negotiating the communicative affordances of platforms and devices as consumers of particular commercial services such as sending remittances as platform gig workers or test cases for new advanced surveillance technologies With its international scope this anthology invites scholars to pluralize understandings of the migrant and the digital The anthology is organized in five different sections Creative Practices Digital Diasporas and Placemaking Affect and Belonging Visuality and digital media and Datafication Infrastructuring and Securitization These sections are dedicated to emerging key topics and debates in digital migration studies and sections are each introduced by international experts I The emphasis on reflective doing of digital migration studies So far scholarship in this interdisciplinary focus area has remained relatively silent on the

topic of accountability and questions of decision making in the research process II The truly transdisciplinary and international scope of the volume distinguishes this volume from the disciplinary oriented special issues and monographs published in the field of media and communication anthropology migration studies and refugee studies Digital migration creates new challenges for cross disciplinary dialogues that require an integration of ethnography with digital methods and critical data studies in order to look at the formation of identity and experience representation community building and creating spaces of belongingness III The innovative emphasis on everyday lived experiences and practices sheds much needed light on the ways in which increasingly documented infrastructures of datafication and digitization are lived negotiated and contested For this purpose the volume pays particular attention to the everyday use of digital media for the support of transnational lives emotional bonds and cosmopolitan affiliations focusing also on the role technologies such as social media and smartphones play in shaping local urban and national diasporic formations This is because it becomes increasingly important to give everyday digital media usage a central role in investigations of transnational belonging digital intimacy diasporic community re production migrant subject formation long distance political participation urban social integration and local national self organization *Turangawaewae* Richard Shaw,2021-08-05 What is a New Zealander What does it mean to be a citizen of or a resident in this country How do we understand what makes New Zealand complex and unique And what creates a sense of belonging and identity both here and in the world Now s a critical time to be thinking about these sorts of things In a post Trump post Brexit world easy slogans have taken the place of reasoning and reasonableness empathy is in retreat and intolerance is on the march History tells us that this is never a good mix In this engaging book experts and thinkers direct their sharp analysis at these and other important issues Written for university students it will appeal to anyone interested in where we have come from and where we are headed It s a book for active participants in Aotearoa New Zealand and in global society **The Preparation of Programs for an Electronic Digital**

Computer Maurice Vincent Wilkes,1951 This is often considered the first book on computer programming It was written for the EDSAC Electronic Delay Storage Automatic Calculator computer that began operation in 1949 as the world s first regularly operated stored program computer The idea of a library of subroutines was developed for the EDSAC and is described in this book Maurice Wilkes lead the development of the EDSAC Digital Libraries Tatjana Aparac,1999
