Computer Control And Human Error:

Computer Control and Human Error Trevor A. Kletz, Paul W. H. Chung, 1995 Examines some of the unforeseen incidents which have occurred in computer controlled process plants and suggests how the risk of such incidents happening again can be minimized The text describes how Hazop studies can be used to detect hazards in computer controlled systems

Computer Control and Human Error Trevor Kletz, 1995-02-12 Computer Control and Human Error presents accounts of various incidents at computer controlled plants These incidents include equipment and software faults treating the computer as a black box misjudging the way operators respond to the computer errors in the data entry failure to inform operators of changes in data or programs and unauthorized interference with peripheral equipment The discussion then turns to the use of hazard and operability studies Hazops to prevent or reduce errors in computer controlled plants The book describes the conventional Hazop as used in the process industry and an overview of the different Hazop frameworks guidelines suggested by engineers and researchers It then presents new Hazop methodology which is based on incident analysis The final chapter presents reasons for failures in computerized systems each of which is illustrated with an example Most of the examples did not cause an actual safety problem simply because they occurred within systems that are not safety related Some of these examples appear in the literature others are from personal experience or from private communications

An Engineer's View of Human Error Trevor A. Kletz, 2001 This is an updated and expanded new edition of Trevor Kletz's work including more examples of accidents caused by the various types of human error It suggests to engineers how they might approach the problem of human error and does so by describing accidents which at first sight seem to be the result of human error The author sets down his views on human error as a cause of accidents and illustrates them by describing a number of accidents that have occurred mainly in the oil and chemical industries He uses a pragmatic approach rather than theoretical to suggest new ways of looking at accident prevention
