## **Computer Solution Of Linear Algebraic Systems:**

Computer Solution of Linear Algebraic Systems George Elmer Forsythe, Cleve B. Moler, 1967      Computer Solution of Large Linear Systems Gerard Meurant, 1999-06-16 This book deals with numerical methods for solving large sparse linear systems of equations particularly those arising from the discretization of partial differential equations It covers both direct and iterative methods Direct methods which are considered are variants of Gaussian elimination and fast solvers for separable partial differential equations in rectangular domains The book reviews the classical iterative methods like Jacobi Gauss Seidel and alternating directions algorithms A particular emphasis is put on the conjugate gradient as well as conjugate gradient like methods for non symmetric problems Most efficient preconditioners used to speed up convergence are studied A chapter is devoted to the multigrid method and the book ends with domain decomposition algorithms that are well suited for solving linear systems on parallel computers      **Numerical Recipes 3rd Edition** William H.

Press, 2007-09-06 Do you want easy access to the latest methods in scientific computing This greatly expanded third edition of Numerical Recipes has it with wider coverage than ever before many new expanded and updated sections and two completely new chapters The executable C code now printed in colour for easy reading adopts an object oriented style particularly suited to scientific applications Co authored by four leading scientists from academia and industry Numerical Recipes starts with basic mathematics and computer science and proceeds to complete working routines The whole book is presented in the informal easy to read style that made earlier editions so popular Highlights of the new material include a new chapter on classification and inference Gaussian mixture models HMMs hierarchical clustering and SVMs a new chapter on computational geometry covering KD trees quad and octrees Delaunay triangulation and algorithms for lines polygons triangles and spheres interior point methods for linear programming MCMC an expanded treatment of ODEs with completely new routines and many new statistical distributions For support or to subscribe to an online version please visit [www.nr.com](http://www.nr.com)
