Cold War Spy Stories from Eastern Europe Valentina Glajar, Alison Lewis, Corina L. Petrescu, 2019-08-01 During the Cold War stories of espionage became popular on both sides of the Iron Curtain capturing the imagination of readers and filmgoers alike as secret police quietly engaged in surveillance under the shroud of impenetrable secrecy And curiously in the post Cold War period there are no signs of this enthusiasm diminishing The opening of secret police archives in many Eastern European countries has provided the opportunity to excavate and narrate for the first time forgotten spy stories Cold War Spy Stories from Eastern Europe brings

together a wide range of accounts compiled from the East German Stasi the Romanian Securitate and the Ukrainian KGB files The stories are a complex amalgam of fact and fiction history and imagination past and present These stories of collusion and complicity betrayal and treason right and wrong and good and evil cast surprising new light on the question of Cold War certainties and divides *The Resolution of Sovereign Debt Crises* Jeannette Abel,2024-11-01 The insolvency of states is by no means a rare or new phenomenon Despite this it still seems to be widely felt that states do not go bankrupt As of yet there are no regulated insolvency proceedings for states This book examines the current mechanisms for solving sovereign debt crises It presents an analysis of their weaknesses and shows possibilities for dealing with such crises in the future In this respect the work focusses on crisis resolution measures at European level the aid packages for Greece the European Financial Stabilisation Mechanism the European Financial Stabilisation Facility and the European Stability Mechanism These are examined for their appropriateness as well as whether they contain elements of insolvency law Ultimately it explores possible insolvency proceedings for states at EU level and their implementation options **Sinn und Form** Stephen R. Parker,Matthew Philpotts,2009 The series publishes monographs and edited volumes that showcase significant scholarly work at the various intersections that currently motivate interdisciplinary inquiry in German cultural studies Topics span all periods of German and German speaking lands and cultures from the local to the global with a special focus on demonstrating how various disciplines history musicology art history anthropology religious studies media studies political theory literary and cultural studies among others and new theoretical and methodological paradigms work across disciplinary boundaries to create knowledge and add to critical understanding in German studies broadly All works are in English Three to four new titles will be published annually The Euro Trap Hans-Werner Sinn,2014-07-31 This book offers a critical assessment of the history of the euro its crisis and the rescue measures taken by the European Central Bank and the community of states The euro induced huge capital flows from the northern to the southern countries of the Eurozone that triggered an inflationary credit bubble in the latter deprived them of their competitiveness and made them vulnerable to the financial crisis that spilled over from the US in 2007 and 2008 As private capital shied away from the southern countries the ECB helped out by providing credit from the local money printing presses The ECB became heavily exposed to investment risks in the process and subsequently had to be bailed out by intergovernmental rescue operations that provided replacement credit for the ECB credit which itself had replaced the dwindling private credit The interventions stretched the legal structures stipulated by the Maastricht Treaty which in the absence of a European federal state had granted the ECB a very limited mandate These interventions created a path dependency that effectively made parliaments vicarious agents of the ECB s Governing Council This book describes what the author considers to be a dangerous political process that undermines both the market economy and democracy without solving southern Europe s competitiveness problem It argues that the Eurozone has to rethink its rules of conduct by limiting the role of the ECB exiting the regime of soft budget

constraints and writing off public and bank debt to help the crisis countries breathe again At the same time the Eurosystem should become more flexible by offering its members the option of exiting and re entering the euro something between the dollar and the Bretton Woods system until it eventually turns into a federation with a strong political power centre and a uniform currency like the dollar
