Challenging Science Standards Charles R. Ault Jr., 2015-08-06 For several decades educators have struggled to

identify the attributes all sciences have in common In the popular mind this effort constitutes the importance of teaching the scientific method In the policy maker s world this pursuit yields standards for all Americans that unify the sciences For teachers the quest for unity has typically meant teaching science as process However a curriculum that prioritizes what all sciences have in common obscures their vital differences For example studying landslides is very different from doing x ray diffraction climate science is unlike medical research Na ve ideas about scientific unity impoverish the public s ability to evaluate scientific enterprises Challenging Science Standards voices skepticism towards the quest for unity Through analyses of disciplinary knowledge school curricula and classroom learning the book uncovers flaws in the unifying dimensions of the science standards It proposes respect for disciplinary diversity and attention to questions of value in choosing what science to teach Illuminated by vignettes of children and adolescents studying topics ranging from snail populations to horse fossils Challenging Science Standards proposes promising remedies Compte rendu de la troisième session, Bruxelles, 1879,1924 Concept-Based Inquiry in Action Carla Marschall,Rachel French,2018-05-30 Create a thinking classroom that helps students move from the factual to the conceptual Concept Based Inquiry is a framework for inquiry that promotes deep understanding The key is using guiding questions to help students inquire into concepts and the relationships between them Concept Based Inquiry in Action provides teachers with the tools and resources necessary to organize and focus student learning around concepts and conceptual relationships that support the transfer of understanding Step by step the authors lead both new and experienced educators to implement teaching strategies that support the realization of inquiry based learning for understanding in any K 12 classroom **Congress of Arts and Science** Howard Jason Rogers,1906
