**Boss Kettering** Stuart W. Leslie, 1983      **Boss Kettering: The Wizard of General Motors** Stuart W. Leslie, 2024-05-03 Recipient of the Columbia University prize in American Economic History in honor of Allan Nevins The life story of Charles F Kettering seems unblemished by any episode that would shake anyone's faith least of all Kettering's in the American Way America's most famous and wealthiest engineer was hired in 1904 by the National Cash Register Company as an inventor He moved onward and upward to become research chief of General Motors and when he died in 1958 at 82 he was justly honored for myriad achievements and very rich to boot Kettering was the great improver of the automobile the machine that we embraced above all as the fulfillment of the democratic and commercial promise of technology Boss Kettering is written from newly explored primary sources and is the best sketch so far of a man of many unfamiliar facets In 1909 Kettering quit NCR to set up with an engineer colleague the Dayton Engineering Laboratories Company better known as Delco to enter the challenging field of automobiles His best known creation was the electric self starter but it was only one of dozens of key improvements patented by Delco's chemical metallurgical and chemical staffs In 1918 General Motors bought out the operation and merged research departments As the Boss of GM's large research staff Kettering developed leaded gasoline polluting but efficient to eliminate knock Freon refrigerants GM owned Frigidaire superior diesel engines for locomotives Duco enamels for car bodies and many other products that enhanced the fortunes of the GM and Du Pont corporations Boss Kettering deserves thoughtful scrutiny by anyone who wants to understand the cultural context of invention in the mass production age The New York Times Kettering who set up and for many years directed the General Motors Research Corporation was widely recognized as the greatest America inventor and engineer since Thomas Edison an absorbing biography The New York Times A major scholarly biography Among the many merits of Leslie's study is the skill with which he probes and illuminates Kettering's long and brilliant career Leslie discerningly analyzes the strengths and limitations inherent in his subject's convictions and leadership style Leslie has combined an impressive amount of research in previously untapped primary sources a sure grasp of scientific and technical detail and a convincing sense of Kettering's human characteristics to excellent effect this solid and superior study amply deserves the favorable recognition it has received and it will serve as a model for future scholarship in the history of industrial research Isis Charles F Kettering has deserved an authoritative scholarly biography he now has it Describing and evaluating Kettering's varied activities and doing so with clarity and judgment constituted a formidable challenge to Stuart Leslie but he has met it with distinction Technology and Culture In this well researched prize winning book Leslie deals with Kettering fairly pointing out his failings and limitations as well as his many triumphs Indiana Magazine of History      **Sloan Rules** David Farber, 2002-11-15 Alfred P Sloan Jr became the president of General Motors in 1923 and stepped down as its CEO in 1946 During this time he led GM past the Ford Motor Company and on to international business triumph by virtue of his brilliant managerial practices and his

insights into the new consumer economy he and GM helped to produce Bill Gates has said that Sloan's 1964 management tome *My Years with General Motors* is probably the best book to read if you want to read only one book about business And if you want to read only one book about Sloan that book should be historian David Farber's *Sloan Rules* Here for the first time is a study of both the difficult man and the pathbreaking executive *Sloan Rules* reveals the GM genius as not only a driven manager of men machines money and markets but also a passionate and not always wise participant in the great events of his day Sloan for example reviled Franklin Roosevelt and the New Deal he firmly believed that politicians government bureaucrats and union leaders knew next to nothing about the workings of the new consumer economy and he did his best to stop them from intervening in the private enterprise system He was instrumental in transforming GM from the country's largest producer of cars into the mainstay of America's Arsenal of Democracy during World War II after the war he bet GM's future on renewed American prosperity and helped lead the country into a period of economic abundance Through his business genius his sometimes myopic social vision and his vast fortune Sloan was an architect of the corporate dominated global society we live in today David Farber's story of America's first corporate genius is biography of the highest order a portrait of an extraordinarily compelling and skillful man who shaped his era and ours

### **Tinkering** Kathleen

Franz, 2011-06-07 In the first decades after mass production between 1913 and 1939 middle class Americans not only bought cars but also enthusiastically redesigned them By examining the ways Americans creatively adapted their automobiles *Tinkering* takes a fresh look at automotive design from the bottom up as a process that included manufacturers engineers advice experts and consumers in various guises Franz argues that automobile ownership opened new possibilities for ingenuity among consumers even as large corporations came to control innovation Franz weaves together a variety of sources from serial fiction to corporate documents to explore tinkering as a form of authority in a culture that valued ingenuity Women drivers represented one group of consumers who used tinkering to advance their claim to social autonomy Some canny drivers moved beyond modifying their individual cars to become independent inventors patenting and selling automotive accessories for the burgeoning national demand for aftermarket products Earl S Tupper was one such tinkerer who went on to invent Tupperware These savvy tinkerers worked in a changing landscape of invention shaped increasingly by automotive giants By the 1930s Ford and General Motors worked to change the popular discourse of ingenuity and used the world's fairs of the Depression as a stage to promote a hierarchy of innovation Franz not only demonstrates the entrepreneurial spirit of American consumers but she engages larger historical questions about gender consumption and ingenuity while charting the impact corporate expansion on tinkering during the first half of the twentieth century
