South Asia Dhananjay Tripathi, Sanjay Chaturvedi, 2021-11-24 Post colonial and post partition South Asia one of the fastest growing and yet one of the least integrated regions of the world is marked by both optimism and pessimism This intriguing dichotomy of strength and weakness security and insecurity hope and fear connections and disconnects underpins South Asia s regionalism conundrum and gives birth to borders and boundaries both material and mental with a complex territoriality The Janus faced nature of South Asian borderlands the inward nationalizing impulses entangled with the outward regional frontier orientations is a stark reminder that history of mobility in this eco geographical region is much older than the history of territoriality and colonial cartography and ethnography This collection of meticulously researched theoretically informed case studies from South Asia provides useful insights into bordering ordering and othering narratives as practices and performances that are intricately entangled with identity politics and security discourses It shows how a sharper focus on subterranean subregionalism s border communities popular geopolitics of enmity and transborder challenges to sustainability could open up spaces for new multiple re imaginings of borders at diverse scales and sights including sub urban neighbourhoods school textbooks cinema and trans border conservation initiatives The chapters in this edited volume have been contributed by both renowned as well as young emerging scholars looking into the borders and boundaries in South Asia Each chapter offers new perspectives and insights into themes like trans Himalayan borderlands India Pakistan physical and mental borders Afghanistan Pakistan border and numerous social boundaries that we see in everyday South Asia The chapters in this book were originally published as a special issue of the Journal of Borderlands Studies

Sinai Perils Human Rights Watch (Organization), Bill Van Esveld, 2008 Since 2006 over 13 000 refugees asylum seekers and other migrants have passed through Egypt and crossed the Sinai border into Israel The majority arrived in Israel since 2007 at times in early 2008 over 100 people per night reportedly crossed the border Both Egypt and Israel have responded to this cross border flow with policies that violate fundamental rights These violations particularly on the Egyptian side have become more numerous and more acute over the past year In August 2007 Egyptian border police shot and beat to death four people trying to cross from Egypt into Israel according to Israeli soldiers who said they witnessed the killings The Israeli soldiers who believed the migrants were Sudanese were close enough to hear the migrants screeching in pain until they died one soldier said Egyptian border police have killed at least 33 migrants and wounded dozens more attempting to cross into Israel since the first known fatality a pregnant Darfuri woman died in June 2007

Accountability for Killing Neta C. Crawford, 2013-09-30 The unintended deaths of civilians in war are too often dismissed as unavoidable inevitable and accidental And despite the best efforts of the U S to avoid them civilian casualties in Afghanistan Iraq and Pakistan have been a regular feature of the United States wars after 9 11 In *Accountability for Killing* Neta C Crawford focuses on the causes of these many episodes of

foreseeable collateral damage and the moral responsibility for them. The dominant paradigm of legal and moral responsibility in war today stresses both intention and individual accountability. Deliberate killing of civilians is outlawed and international law blames individual soldiers and commanders for such killing. An individual soldier may be sentenced life in prison or death for deliberately killing even a small number of civilians but the large scale killing of dozens or even hundreds of civilians may be forgiven if it was unintentional incidental to a military operation. The very law that protects noncombatants from deliberate killing may allow many episodes of unintended killing. Under international law civilian killing may be forgiven if it was unintended and incidental to a militarily necessary operation. Given the nature of contemporary war where military organizations training and the choice of weapons doctrine and tactics create the conditions for systemic collateral damage Crawford contends that placing moral responsibility for systemic collateral damage on individuals is misplaced. She develops a new theory of organizational moral agency and responsibility and shows how the US military exercised moral agency and moral responsibility to reduce the incidence of collateral damage in America's most recent wars. Indeed when the US military and its allies saw that the perception of collateral damage killing was causing it to lose support in the war zones it moved to a population centric doctrine putting civilian protection at the heart of its strategy. Trenchant original and ranging across security studies international law ethics and international relations **Accountability for Killing will reshape our understanding of the ethics of contemporary war** Intersection of AI and Business Intelligence in Data-Driven Decision-Making Natarajan, Arul Kumar, Galety, Mohammad Gouse, Iwendi, Celestine, Das, Deepthi, Shankar, Achyut, 2024-08-28 In today's rapidly evolving business landscape organizations are inundated with vast amounts of data making it increasingly challenging to extract meaningful insights and make informed decisions.
