The study of linguistics has been forever changed by the advent of the computer Not only does the machine permit the processing of enormous quantities of text thereby securing a better empirical foundation for conclusions but also since it is a modelling device the machine allows the implementation of theories of grammar and other kinds of language processing Models can have very unexpected properties both good and bad and it is only through extensive tests that the value of a model can be properly assessed The computer revolution has been going on for many years and its importance for linguistics was recognized early on but the more recent spread of personal workstations has made it a reality that can no longer be ignored by anyone in the subject The present essay in particular could never have been written without the aid of the computer I know personally from conversations and consultations with the author over many months how the book has changed If he did not have at his command a powerful typesetting program he would not have been able to see how his writing looked and exactly how it had to be revised and amplified Even more significant for the evolution of the linguistic theory is the easy testing of examples made possible by the implementation of the parser and the computer held lexicon Indeed the rule set and lexicon grew substantially after the successes of the early implementations created the desire to incorporate more linguistic phenomena *Pictures to amuse, and tales to please; by aunt Fanny* Frances Elizabeth Barrow,1879 **Outlook** Alfred Emanuel Smith,Francis Walton,1919 The Electrical Experimenter ,1919 The Popular Science Monthly ,1921 *The Literary Digest* ,1919 *The Green Book Magazine* ,1919 **The Cosmopolitan** ,1915 **System** ,1920 *American Illustrated Magazine* ,1920 **American Magazine** ,1919 **Macmillan's Magazine** ,1881 **St. Nicholas** Mary Mapes Dodge,1902
