

I feel very strongly that I'm
surrounded by other realities.

Ingmar Bergman

Being And Other Realities

Horatio Willis Dresser

Being And Other Realities:

Being and Other Realities Paul Weiss, 1995 Book jacket back Being and Other Realities by our greatest living metaphysician pushes Paul Weiss's philosophy to new subtlety. It moves on two fronts. On one it further refines the categorial scheme Weiss has been developing over 50 years. On the other it is a shining example of radical questioning and exploration. This is an important book especially for philosophers like myself who believe being is not another reality. Robert C. Neville, Boston University, Author of *Normative Cultures* and *The Truth of Broken Symbols* [Astral Planes and Your Other Realities](#)

Valentin Matcas, 2016-04-20 Can you visit other planes and realities? But can you live other lives there in your other planes and realities? People can always tell beautiful paranormal stories or who knows you might have already been there yourself. You saw them, felt them, and now this is why you search through all higher knowledge to learn more about your experience. But was it real? Are your other worlds real as real as this world? All realities are real in a rather trivial manner. And even more, all realities are objectively real but only as long as you are there. Since existence defines them, similarly determining closely your continuous firsthand experience. Furthermore, many realities are part of life, part of this life that we have here in this world. And now if you have found your way into these other planes of existence in a conscious manner, it might have been a natural process altogether and not exactly a random experience. It had a purpose while you might have missed fulfilling it, and now it is certainly meaningful to know everything that you can ever discover. Yet if you have never had a paranormal experience yourself, and now you simply wonder what is going there, are there very powerful drugs that you take regularly with your food, drinks, and medicine meant to hold you forcefully in this world? And now this is exactly what you do, you remain here nicely for life. And it happens with everybody or almost depending on where you live or depending on your development and genetic background. There is a difference between astral planes, the natural human environment, and your other realities. Because existence comes in three distinct levels used to distinguish between your higher and lower realities. While you can understand all your realities through your mind, reasoning, awareness, and imagination, since even this world makes sense to you only as part of your reasoning, awareness, mind, and imagination, and not exactly directly as anyone may expect. And this is the case because there is no other way to experience anything in life and in the wider world but through your perception, reasoning, and understanding, and through the multitude of your selves, intelligences, and identities present throughout all your realities. And this is why you cannot understand astral planes along with your other realities if you do not understand your cognitive system first along with your intelligences, selves, memories, and expectations, since everything is interconnected. This interesting entanglement of meanings and constraints causes the ultimate truth of your wider existence to remain hidden beneath strong consensual conditions and within tedious loops of reasoning, remaining inaccessible in this manner to the ignorant and to the unconditional follower of common ideologies while allowing the truth only to those living life freely, consciously, and in full awareness and understanding of the wider world through the fulfillment of all natural, higher level

needs and meanings Because these are your developmental opportunities that you experience in each one of your worlds and realities while following the fulfillment of your natural intelligent human needs for higher experience and higher development This book studies you and your life and existence throughout all your realities that you employ encounter inhabit create and co create throughout your wider existence helping you understand who you are through all your selves and intelligences as you live your life throughout all your worlds and realities If you seek to gain wider understanding of who you truly are this book is for you Other Times, Other Realities Arnold H. Modell,1990 Nearly a century has passed since Freud s theories unleashed a revolution in our understanding of the human psyche Yet as Arnold Modell firmly points out we still do not possess a theory that explains how psychoanalysis works Other Times Other Realities provides brilliant insight into this perplexing problem and lays the foundation for a comprehensive theory of psychoanalytic treatment Modell s careful consideration of Freudian theory the interpretations of contemporary ego psychology and the contribution of object theory discloses the changing significance of the fundamental elements of the therapeutic process In Other Times Other Realities readers will discover an illuminating synthesis of concepts underlying the various interpretations of the psychoanalytic process The Cyber Meta-Reality Joshua A. Sipper,2022-04-04 As one begins to explore the many complexities of quantum computing nanotechnology and AI it becomes clear that there is an underlying reality within cyberspace that is comprised of other realities and that these realities all have their own biomes ecosystems and microbiomes built on information energy and human creative reality and potential It is clear that there has not been much research on this especially the piece dealing with the cyber microbiome which looks at the part of the iceberg that is under the surface and makes up most of cyberspace much like how our human microbiome is many orders of magnitude larger than our human cells The microbiome is extremely important from the perspective of how to treat diseases in humans especially bacterial infections The same is true for how to treat diseases in the cyber meta reality Thus knowing all we can about the cyber meta reality biome and microbiome is absolutely necessary in ensuring this world s growth care and flourishing **Ontology; Or, The Theory of Being** Peter Coffey,1926 **The Human Civilization** Valentin Matcas,2016-04-20 Were there advanced civilizations on Earth older than what it is currently believed and accepted Because we keep noticing their traces everywhere while authorities deny their presence Are there other civilizations out there among planets and stars Because we keep seeing their people around here pursuing their obscure interests with authorities ignoring everything Are there nonhuman civilizations on Earth in parallel with the human civilization Because they interact from the shadow of the underground with the human civilization while again authorities deny systematically their presence And when authorities are constrained in any way to give an answer they state vaguely that it is a matter of human survival And how can humans defend themselves of anyone and anything as they are held in ignorance and denial Is there life after death Because countless of people had died and came back to tell their story and it is always consistent This implies the existence of higher extraordinary civilizations in parallel with the human

civilization from above These higher civilizations could be possible since their niches of life and existence are accurate and already present within other realities Science and academia ignore this topic entirely ridiculing all seekers of higher truth and forcing them in this manner to stop their research What can there be more important to know in this world than the meaning of life itself the meaning of this entire human civilization along with the meaning of the lives and existence of all humans here in this world and in all higher worlds Why postponing disclosure if it is imperative for people s wider existence Who profits and who loses through this entire coverup Who exactly controls the current human authority Why is humanity kept ignorant in what it concerns the most important subject of all life everywhere and life eternally intelligent and civilized life Because if there are other civilizations on Earth and elsewhere human or not if there are other realities up there besides this one populated and civilized then people s ignorance renders them vulnerable when they die and have to go elsewhere In this manner once you ignore the kind of realities that may be out there you might be tricked to go and live in treacherous dubious unholy worlds claiming that they are in fact the holly lands promised to you by your own religion And so you disappear Because it is stated in religious records to be careful not to follow false deities Yet how can you know anything in this domain if you are kept ignorant the entire time and probably lied to misled and many times tempted with irrelevant material compensations throughout life This book helps you understand civilizations from a rigorous comprehensive perspective including the meaning interests agreements and intentions that civilizations have in the wider world why individuals form civilizations as an end product of their cumulative lifetime efforts and furthermore what meanings these civilizations have in the wider world

The Month ,1891 **Metaphysic. (System of phil., 2).** Rudolf Hermann Lotze,1884 How to Read and Understand Educational Research James Williams,2020-03-02 If you re studying education much of what you do is informed by educational research but how do you interpret it effectively How do you judge whether results are valid or relevant This is the perfect guide to engaging with educational research It explores how to read journal articles critically what key academic terms really mean different approaches to educational research how they are used and what they aim to uncover and how high quality findings can be meaningful for teaching and learning Supported by examples that demonstrate the use and misuse of research in education this is your essential guide to understanding and effectively using research
