Being And Time:

Heidegger's Being and Time Richard Polt, 2005-09-15 Heidegger's Being and Time Critical Essays provides a variety of recent studies of Heidegger's most important work Twelve prominent scholars representing diverse nationalities generations and interpretive approaches deal with general methodological and ontological questions particular issues in Heidegger's text and the relation between Being and Time and Heidegger's later thought All of the essays presented in this volume were never before available in an English language anthology Two of the essays have never before been published in any language Dreyfus and Guignon three of the essays have never been published in English before Grondin Kisiel and Thom and two of the essays provide previews of works in progress by major scholars Dreyfus and Kisiel Being and Time Welch, Cyril, 2001

Becoming who We Already Are: Human Existence and Originary Temporality in "Being and Time". Nathan Murray Zuckerman, University of Chicago, 2012 In Being and Time Heidegger invokes a non sequential concept of time called originary temporality in order to interpret what it means to be a human being I argue for a new reading of this temporal interpretation on the grounds that the three most prevalent readings do not fully account for Heidegger's text or his philosophical view Drawing upon his inheritance of key concepts in Aristotle's metaphysics I argue that the explanatory target of originary temporality should be understood as a distinctively human activity of commitment In particular our agency identity and understanding are possible only because we can commit ourselves to an interpretive stance on how things can and cannot possibly make sense and matter to us and what it could and could not be to embody this stance in our actions here and now But since our capacity for such commitment is threatened by the kinds of existential breakdown Heidegger calls anxiety and death we face an ongoing task of not only embodying the commitment in the present but moreover maintaining our capacity for such commitment in the future and vindicating our questionable claim to have been so committed all along in the past In this sense the activity of being human has a non sequential temporal structure and unity and we can best understand the core issue of Heidegger's philosophical project in Being and Time the very possibility of caring about and making sense of our selves our lives and our world **Bulletin** National Catholic Welfare Council (U.S.), 1922
