

6 CHARACTERISTICS of a COLLABORATIVE LEADER

FOCUS ON THE ENVIRONMENT

Create a participatory environment where people can feel engaged and challenged. Decentralized power, organize a network to have a systemic vision involving the whole business. Manage the system, not the people.

KNOW YOUR COLLEAGUES

Giving full attention to people is the foundation for collaboration. Know people deeply. Showing interest and getting to know each other is foundational for a psychologically safe environment. Breaking silos and work cross-functionally, even across teams. Focus on your influence rather than your power.

ACTIVELY LISTEN

Collaborative Leadership prioritizes communication, which must be a two-way road. Feedback is used in all directions in a constant learning approach.

WALK THE TALK

Collaborative Leadership tends to align speech with action. What is said is what is seen in practice. That goes hand in hand with being authentic as a leader.

EMPATHY

In a collaborative environment, people are not seen as just another number, but as a complete human being, with values and history, who is not left out within the group. Empathy is crucial in such environments.

FOCUS ON RESULTS

Teams with Collaborative Leadership have a strong focus on results, and a true culture of problem-solving, without wasting energy looking for someone to blame for mistakes.

Collaborative Leadership David Archer, Alex Cameron, 2009-02-04 Collaborative leadership is about delivering results across boundaries The nature of that boundary is important whether it s a formal contract or an informal agreement between two parties to work together for a common aim And leaders need to be clear about where the boundary lies and how to use the different capabilities on either side of it to build a positive and efficient relationship As the poet Robert Frost once put it Good fences make good neighbours Getting value from difference is at the heart of the collaborative leader s task But that is not without its challenges As in many marriages it is often this difference in skills experience resources or culture that attracts organisations to work together in the first place Then as time goes by people start to rail against that very difference and try to remove it wherever it causes frustration in the joint operation An often heard criticism is Why can t they be more like us But of course the truth is that if they were you d have lost the very reason that brought the two of you together So collaborative leaders have to pull off a tricky balancing act on the one hand respecting and valuing the differences of a partner while on the other smoothing out some of those differences in the interests of making the relationship work more efficiently At the same time leaders have to learn to share control and to trust a partner to deliver even though that partner
