

The Modes of Constitutional Analysis: Structuralism (Part 7)

January 13, 2022

This Legal Sidebar Post is the seventh in a nine-part series that discusses certain “methods” or “modes” of analysis that the Supreme Court has employed to determine the meaning of a provision within the Constitution. (For additional background on this topic and citations to relevant sources, please see CRS Report R45129, *Modes of Constitutional Interpretation*.)

One of the most common modes of constitutional interpretation is based on the Constitution’s structure. Drawing inferences from the Constitution’s design gives rise to some of the most important relationships the Constitution establishes—the relationships among the three branches of the federal government (commonly called *separation of powers* or *checks and balances*); the relationship between the federal and state governments (known as *federalism*); and the relationship between the government and the people. Two basic approaches seek to make sense of these relationships.

The first, known as *formalism*, posits that the Constitution sets forth all the ways in which federal power may be shared, allocated, or distributed. This approach focuses on the structural divisions in the Constitution with the idea that close adherence to these rules is required to achieve the preservation of liberty. An example of the use of this form of structuralism as a mode of interpretation is found in *Immigration and Naturalization Service v. Chadha*. In that case, the Court held that one house of Congress could not by resolution unilaterally curtail the executive branch’s statutory authority to allow a deportable alien to remain in the United States. The Court examined the Constitution’s structure and noted that, under the Bicameralism and Presentment Clauses in Article I, Sections 1 and 7, laws with subject matter that is “legislative in character or effect” require passage by a majority in both houses and presentment to the President for his signature or veto. The Court wrote: “It emerges clearly that the prescription for legislative action in [Article I, Sections 1 and 7 of the Constitution] represents the Framers’ decision that the legislative power of the Federal Government be exercised in accord with a single, finely wrought and exhaustively considered, procedure.” Viewing the exercise of the one-house veto in *Chadha* to be of a legislative nature, the Court concluded that the structural relationships the Constitution established between the legislative and executive branches forbid the “one-House legislative veto.” As demonstrated in *Chadha*, a formalist approach to separation-of-powers questions rejects not only looking to post-ratification historical practices as a guide for determining constitutional meaning, but also eschews balancing tests that weigh the degree of interference with one branch’s powers.

Constitutional Analysis in a Nutshell Jerre Stockton Williams, 1979 A succinct exposition of the law to which a student or lawyer can turn for reliable guidance Back cover **An Economic Analysis of the Constitutional Restrictions Upon Municipal Indebtedness in Illinois** Ward Leslie Bishop, 1928 *An Economic Analysis of the Constitutional Restrictions Upon Public Indebtedness in the United States* Horace Secrist, 1914 **State Constitutional Law**, 1988 **The Constitution As Political Structure** Martin H. Redish, 1995-01-05 Over the last forty years modern constitutional scholarship has concentrated on an analysis of rights while principles of constitutional law concerning the structure of government have been largely downplayed The irony of this interpretive emphasis is that the body of the Constitution contains relatively little dealing directly with rights Rather it is primarily a blueprint for the establishment of a complex form of federal democratic structure This work emphasizes the central role served by the structural portions of the Constitution Redish argues that these structural values were designed to provide the framework in which our rights based system may flourish and that judicial abandonment of these structural values threatens the very foundations of American political theory

A History and Analysis of the constitution of the United States, with a full account of the Confederations which preceded it ... Second edition Nathaniel C. TOWLE, 1873 *The Context of Constitution* Dimitri Ginev, 2006-07-20 This study brings together ideas developed over many years in various lectures in an endeavour to clarify the concept of hermeneutic fore structure of scientific research The starting point of my investigations was the outline of an interpretative approach to the constitution of science's cognitive content In the late 1970s I was preoccupied with a question that nowadays should be formulated as follows Is it possible to claim a validity of the hermeneutic view of the situatedness in a tradition also for the natural sciences I was convinced that the negative answer implies a self defeating position It states that in order to champion the cultural universality of hermeneutics one has to profess the non hermeneutic nature of the natural sciences Paradoxically enough this a priori presupposes a sharp dividing line between dialogical experience and monological research in culture in order to stress the universality of hermeneutics Long before the period of perestroika in my corner I learned from

Joseph Kockelmans Patrick Heelan and Theodore Kisiel how the universalization of hermeneutics can include the natural sciences without ignoring their cognitive specificity Somewhat later in the aftermath of the discussions over the finalization of science I began to confront the view that it would be a kind of trivializing the struggle for a philosophical hermeneutics if the theory observation nexus is treated as a specific hermeneutic circle No doubt the view is correct I was however dissatisfied with the way of arguing for it
