PREFACE

THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is dependent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream fishing

**Dutch Cartesianism and the Birth of Philosophy of Science** Andrea

Strazzoni,2018-11-19 How did the relations between philosophy and science evolve during the 17th and the 18th century This book analyzes this issue by considering the history of Cartesianism in Dutch universities as well as its legacy in the 18th century It takes into account the ways in which the disciplines of logic and metaphysics became functional to the justification and reflection on the conceptual premises and the methods of natural philosophy changing their traditional roles as art of reasoning and as science of being This transformation took place as a result of two factors First logic and metaphysics which included rational theology were used to grant the status of indubitable knowledge of natural philosophy Second the debates internal to Cartesianism as well as the emergence of alternative philosophical world views such as those of Hobbes Spinoza the experimental science and Newtonianism progressively deprived such disciplines of their foundational function and they started to become forms of reflection over given scientific practices either Cartesian experimental or Newtonian

The Rigor of Things Jean-Luc Marion, Dan Arbib, 2017-08-08 In a series of conversations Jean Luc Marion reconstructs a career's path in the history of philosophy theology and phenomenology Discussing such concepts as the event the gift and the saturated phenomenon Marion elaborates the rigor displayed by the things themselves He discusses the major stages of his work and offers his views on the forces that have driven his thought The conversation ranges from Marion's engagement with Descartes to phenomenology and theology to Marion's intellectual and biographical backgrounds concluding with illuminating insights on the state of the Catholic Church today and on Judeo-Christian dialogue Marion also reflects on the relationship of philosophy to history theology aesthetics and literature At the same time the book provides an account of French intellectual life in the late twentieth century In these interviews Marion's language is more conversational than in his formal writing but it remains serious and substantive The book serves as an excellent and comprehensive introduction to Marion's thought and work

**Burchard de Volder and the Age of the Scientific Revolution** Andrea Strazzoni, 2019-11-18 This monograph details the entire scientific thought of an influential natural philosopher whose contributions unfortunately have become obscured by the pages of history Readers will discover an important thinker Burchard de Volder He was instrumental in founding the first experimental cabinet at a European University in 1675 The author goes beyond the familiar image of De Volder as a forerunner of Newtonianism in Continental Europe He consults neglected materials including handwritten sources and takes into account new historiographical

categories His investigation maps the thought of an author who did not sit with an univocal philosophical school but critically dealt with all the major philosophers and scientists of his age from Descartes to Newton via Spinoza Boyle Huygens Bernoulli and Leibniz It explores the way De Volder s un systematic thought used rejected and re shaped their theories and approaches In addition the title includes transcriptions of De Volder s teaching materials disputations dictations and notes Insightful analysis combined with a trove of primary source material will help readers gain a new perspective on a thinker so far mostly ignored by scholars They will find a thoughtful figure who engaged with early modern science and developed a place that fostered experimental philosophy

**Cartesian Studies** Ronald Joseph Butler,1972 **Descartes on Innate Ideas** Deborah A. Boyle,2009-07-28 Offers the first sustained treatment of Descartes s conception of innateness *New Views of the Moon* Bradley L. Jolliff,Mark A. Wiczorek,Charles K. Shearer,Clive R. Neal,2018-12-17 Volume 60 of Reviews in Mineralogy and Geochemistry assesses the current state of knowledge of lunar geoscience given the data sets provided by missions of the 1990 s and lists remaining key questions as well as new ones for future exploration to address It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of information The Moon is the only body other than Earth for which we have material samples of known geologic context for study This volume seeks to show how the different kinds of information gained about the Moon relate to each other and also to learn from this experience thus allowing more efficient planning for the exploration of other worlds
