Casebased Telematic Systems:

Health-Care Telematics in Germany Ali Sunyaev,2011-04-25 Ali Sunyaev develops a method for the organizational and technical analysis of security issues in health care He identifies security problems in the current concept of German health care telematics and derives recommendations for future developments in the health care sector Advances in Health Telematics Education John Mantas,1998 Get a head start The Student Workbook which contains all of the Assessments Activities and Worksheets from the Instructor s Resource Binder Use it for classroom discussions in class activities and group work *Case Mix: Global Views, Local Actions* Francis Henri Roger France,I. Mertens,M.-C. Closon,Jacob Hofdijk,2006-10-15 Diagnosis Related Groups DRGs were the first health management tool to group patients in clinical meaningful categories with homogeneous resources consumption DRGs have been selected in 1983 as the prospective payment system for MEDICARE patients in the USA This innovation migrated to several Western countries first in Eastern Europe and in Asia soon thereafter What is the present situation This book describes the actual state of case mix uses in twenty countries all over the world Experts from Australia Austria Belgium Denmark Finland France Germany Great Britain Ireland Japan South Korea Mexico the Netherlands Romania Russia South Africa Spain Sweden Switzerland the USA accepted to describe the development and adaptations of case mix in their country In addition they provide a concise analysis of health care organization financing methods and information checking in these countries Such information cannot be found easily in the literature It gives physicians hospital managers researchers and policy makers a basis for making decisions on new paths to develop in health care delivery systems **Advances in Case-Based Reasoning** Enrico Blanzieri,Luigi Portinale,2003-07-31 This book constitutes the refereed proceedings of the 5th European Workshop on Case Based Reasoning EWCBR 2000 held in Trento Italy in September 2000 The 40 revised full papers presented together with two invited contributions were carefully reviewed and selected for inclusion in the book All curves issues in case based reasoning ranging from foundational and theoretical aspects to advanced applications in various fields are addressed **Personal Medical Information** Ross Anderson,2012-12-06 In the last few years the protection of computerised medical records and of other personal health information has become the subject of both technical research and political dispute in a number of countries In Britain the issue arose initially as an argument between the British Medical Association and the Department of Health over whether encryption should be used in a new medical network In Germany the focus was the issue to all patients of a smartcard to hold insurance details and facilitate payment while in the USA the debate has been whether federal law should preempt state regulation of computerised medical records and if so what technical and legal protection should be afforded the patient Whatever the origin and evolution of this debate in specific countries it has become clear that policy and technical matters are closely intertwined What does computer security mean in the medical context What are we trying to do What are the threats that we are trying to forestall What costs might reasonably be incurred To what extent is the existing

technology largely developed to meet military and banking requirements of use And perhaps hardest of all what is the right balance between technical and legal controls As the debate spread it became clear that there was little serious contact between the people who could state the requirements clinical professionals medical ethicists and patients and the people who could explore how to meet
