*Media Capitalism* Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media's ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book's historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society

*Tropical Forest Conservation and Industry Partnership* Connie J. Clark, John R. Poulsen, 2012-03-16 Historically the conservation of forests and wildlife has focused on the creation of national parks and reserves However only 9% of protected areas are larger than 14 000 hectares likely making them too small to conserve ecosystem services and prevent loss of wide ranging keystone species such as elephant and leopard New approaches are needed that extend conservation beyond protected area boundaries into areas where economic considerations prevail The book describes one such emerging model of conservation the integration of the private sector into partnerships to protect biodiversity and improve forest management While such partnerships are being created in nearly every sector of resource extraction detailed analyses of how such partnerships work and whether they benefit biodiversity conservation are rare

Using a case study from the Congo Basin the book examines principles of conservation and partnership and provides technical and methodological details to replicate an innovative conservation model It presents concrete solutions for expanding conservation across multi use landscapes a necessary action as industry expands to all the corners of the globe
