Communication Network Protocols Osi Explained:

Communication Network Protocols Brian W. Marsden,1991 The third edition of this undergraduate and post graduate text should be of interest to those needing a grounding in the principles of Open Systems Interconnection The OSI material in the third edition has been expanded and updated to include the 1988 revision of the Message Handling Systems recommendations changes to CCR and the acknowledged connectionless LAN logical link control class of procedure traditional message switching techniques based on the now defunct BSC protocol in order to highlight the weaknesses of this approach rather than examine these procedures in detail This discussion leads naturally to a discussion of protocol structuring and standardization containing a chapter on standards organizations and the standards process followed by detailed discussions of HDLC X 25 and the triple X character terminal handling recommendations by briefly examining some UK academic interim application protocols The reference model itself is then discussed together with general OSI conventions To round off this part the lowest three OSI layers physical data link and network are examined in detail particular emphasis being placed on local area networks IEEE project 802 and the relationship of X 25 to OSI applications chapters being devoted to the transport session and presentation layers as well as the structure of the application layer and the ACSE 1988 CCR 1990 RTSE 1988 and ROSE 1988 application services The discussion of the presentation layer includes detailed material on ASN 1 chapter each on the FTAM JTM VT and MHS standards as well as one containing material on registration formal definition conformance profiles the OSI directory and brief discussions of some other emerging applications such as MMS ODA SGML TP and RDA CCITT recommendations
