Communication Studies:

Microhistories of Communication Studies Pat Gehrke, 2018-04-19 The story of an academic discipline is usually conveyed in grand movements and long spans but it can also be told through the lives of individual scholars through the development of specialties through the creation and change of departments and through the formation and transformation of organizations Using twelve histories of micro dimensions of communication studies this volume shows how sometimes small decisions single scholars individual departments and marginalized voices can have dramatic roles in the history and future of an academic discipline As a compilation of micro histories with macro lessons this volume stands alone in communication studies Read as a companion to A Century of Communication Studies the National Communication Association s centennial volume it offers rich detail missing links and local narratives that fully flesh out the discipline In either case no education in communication studies is complete without an understanding of the themes challenges and triumphs embodied by the twelve micro histories offered in this book This book was originally published as two special issues of Review of Communication

Routledge Handbook of African Media and Communication Studies Winston Mano, Viola Milton, 2021-02-11 This handbook comprises fresh and incisive research focusing on African media culture and communication The chapters from a cross section of scholars dissect the forces shaping the field within a changing African context It adds critical corpora of African scholarship and theory that places the everyday worlds needs and uses of Africans first The book goes beyond critiques of the marginality of African approaches in media and communication studies to offer scholars the theoretical and empirical toolkit needed to start building critical corpora of African scholarship and theory that places the everyday worlds needs and uses of Africans first Decoloniality demands new epistemological interventions in African media culture and communication and this book is an important interlocutor in this space In a globally interconnected world changing patterns of authority and power pose new challenges to the ways in which media institutions are constituted and managed as well as how communication and media policy is negotiated and the manner in which citizens engage with increasing media opportunities The handbook focuses on the interrelationships of the local and the global and the concomitant consequences for media practice education and citizen engagement in today s Africa Altogether the book foregrounds convivial epistemologies relevant for locating African media and communication in the pluriverse This handbook is an essential read for critical media communications cultural studies and journalism scholars

Communication Studies Sheila Steinberg,2007 In this introductory textbook the author contextualises approaches and theories on communication studies by making use of local examples from the mass media as well as relevant political and social experiences The book is divided into two parts The first provides students with a strong foundation in communication while the second focuses on the areas of specialisation within communication studies Each chapter starts with the learning Outcomes and a short overview of the chapter Students can monitor their learning by using the summaries and test yourself questions at the end of every chapter Scenarios provide examples of how the theory can be applied in practice This makes for a learner friendly and accessible book which will prove invaluable to Students and professionals alike Beginner students majoring in Communication Studies as well as those studying towards various degrees or qualifications where communication is a prerequisite will find this book useful *Communication Studies* Andrew Beck,2004 Journalism and Human Rights John C. Pollock,2017-10-02 This book is the first collection of original research to explore links between demographics and media coverage of emerging human rights issues It covers cross national reporting on human trafficking HIV AIDS water contamination and child labour and same sex marriage Guantanamo detainee rights immigration reform and post traumatic stress disorder in the United States The research asks questions such as What are the principal catalysts that propel rights issues into media agendas Why do some surface more quickly than others And how do the demographics of cross national reporting differ from those driving multi city US nationwide coverage of rights claims Using community structure theory and innovative Media Vector content analysis the eight chapters of this book reveal three striking patterns that show how differences in female empowerment social or economic vulnerability and Midwestern newspaper geographic

location link powerfully with variations in coverage of rights issues The patterns connecting demographics and rights claims confirm that coverage of human rights can mirror the concerns of stakeholders and vulnerable groups contrary to conventional assumptions that media typically serve as guard dogs reinforcing the interests of political and economic elites This book was originally published as a special issue of The Atlantic Journal of Communication British Qualifications Kogan Page,2004 In a single volume the new edition of this guide gives comprehensive coverage of the developments within the fast changing field of professional academic and vocational qualifications career fields their professional and accrediting bodies levels of membership and qualifications and is a one stop guide for careers advisors students and parents It should also enable human resource managers to verify the qualifications of potential employees **Introduction to Communication Studies** John Fiske,2002-09-11 The second edition of this widely used introductory textbook updates the work to take accounts of developments in the last few years John Fiske s study equips the reader with a range of methods of analysing examples of communication in our society together with a critical awareness of the theories underpinning them The reader will be able to tease out the latent cultural meanings in such apparently simple communications as news photos or popular TV programmes *Communication in Everyday Life* Steve Duck,David T. McMahan,2019-12-10 Communication in Everyday Life A Survey of Communication offers an engaging introduction to communication based on the belief that communication and relationships are always interconnected Best selling authors Steve Duck and David T McMahan incorporate this theme of a relational perspective and a focus on everyday communication to show the connections between concepts and how they can be understood through a shared perspective Students will learn how topics in communication come together as part of a greater whole as well as gain practical communication skills from listening to critical thinking and using technology to communicate The Fourth Edition includes enhancements to its proven pedagogical features that reflect updates in research cultural and societal changes and emerging issues **Decolonizing Communication Studies** Kehbuma Langmia,2022-03-18 This volume examines the effects of the decolonization of communication studies It shows that the discipline has undergone a rapid paradigm shift since the launching of the Ferment in the Field special edition of the Journal of Communication in which scholars were called upon to rethink the field because of the crisis it was facing *Transformative Communication Studies* Omar Swartz,2008-01-01 This interdisciplinary collection of essays charts intersections between communication cultural studies and a variety of emergent emancipatory and liberatory discourses Every essay attempts in one way or another to speak to the following questions What would a theory of liberation look like that is premised on a communication view of the world How would such a view expand and even redefine our understanding of liberation Finally how would such a view enlarge our understanding of what is collectively communally and organizationally possible In other words the chapters articulate what can be loosely considered a humanist theory of communication and praxis The goal is to move beyond discourses of liberation that are grounded in essentialist

assumptions and to move the conversation toward an engaged criticism on cultural and social levels that facilitates and encourages progressive action This edited collection thus has as its goal a theory of human liberation grounded in communication as a resource for social and spiritual transformation The chapters comprise a mix of conceptual and applied studies that interrogate the communicative practices that naturalize our hierarchical world reifying and stultifying our moral and political imaginations As an antidote to this problem the contributors consider the importance of uncertainty and contingency in the development of human potential Rather than fearing uncertainty and contingency and allowing that fear to control us contributors argue that we should find within these conditions the source of our humanity and the strength to question and resist unjust social reifications When we do this we will rediscover the power of communication and regain an agency and control over our lives We then can start the difficult but humanizing process of constructing the world anew Case study exemplars of this construction thus are showcased
