Mass Communications Research Resources Christopher H. Sterling,James K. Bracken,Susan B. Hill,2016-05-06 This reference book is designed as a road map for researchers who need to find specific information about American mass communication as expeditiously as possible Taking a topical approach it integrates publications and organizations into subject focused chapters for easy user reference The editors define mass communication to include print journalism and electronic media and the processes by which they communicate messages to their audiences Included are newspaper magazine radio television cable and newer electronic media industries Within that definition this volume offers an indexed inventory of more than 1 400 resources on most aspects of American mass communication history technology economics content audience research policy and regulation The material featured represents the carefully considered judgment of three experts two of them librarians plus four contributors from different industry venues The primary focus is on the domestic American print and electronic media industries Although there is no claim to a complete census of all materials on print journalism and electronic media what is available is now too vast for any single guide the most important and useful items are here The emphasis is on material published since 1980 though useful older resources are included as well Each chapter is designed to stand alone providing the most important and useful resources of a primary nature organizations and documents as well as secondary books and reports In addition online resources and internet citations are included where possible

Journalism Jo A. Cates,2004-05-30 *Journalism A Guide to the Reference Literature* is a critically annotated bibliographic guide to print and electronic sources in print and broadcast journalism The first edition was published in 1990 the second in 1997 It has been described as one of the critical reference sources in journalism today and it is a key bibliographic guide to the literature Choice magazine called it a benchmark publication for which there are no comparable sources The format is similar to the second edition What makes this edition significantly different is the separation of Commercial Databases and Internet Resources Commercial Databases includes standard fee based resources The new chapter on Internet sources features Web

based resources not included in the commercial databases chapter as well as portals other online files listservs newsgroups and Web logs blogs All chapters have been revised and there are significant revisions in Directories Yearbooks and Collections Miscellaneous Sources Core Periodicals Societies and Associations and Research Centers and Archives The second edition has 789 entries The third edition contains almost 1 000 entries James Carey of Columbia University who provided the foreword for the first two editions has updated his foreword for this edition

International Dictionary of Broadcasting and Film Desi Bogner,1999-12-20 No matter what continent you are on the distinct professional language of radio and television broadcasters and film and video makers remains the same Still the only reference that is international in scope The International Dictionary of Broadcasting and Film Second Edition is a comprehensive guide to professional filmmaking and broadcasting terminology Entries also include information on professional organizations festivals and awards Appendices contain tables of international television and film standards frequencies and channels and a list of national and international news agencies and their standard abbreviations This book has been substantially revised and updated to include coverage of the new digital technology plus information on the history of film and broadcasting It is a valuable reference to professionals in broadcasting and filmmaking as well to students in these fields Routledge Revivals: Radio Broadcasting from 1920 to 1990 (1991) Diane Foxhill Carothers,2016-11-10 First published in 1991 this book presents a comprehensive annotated bibliography of radio broadcasting Its eleven chapter categories cover almost the entire range of radio broadcasting with the exception of radio engineering due to its technical complexity although some of the historical volumes do encompass aspects thus providing background material Entries are primarily restricted to published books although a number of trade journals and periodicals are also included Each entry includes full bibliographic information including the ISBN or ISSN where available and an annotation written by the author with the original text in hand

Broadcast Journalism Andrew Boyd,1988

Broadcasting in America Sydney W. Head,Christopher H. Sterling,1982 *Radio Journalism in America* Jim Cox,2013-04-29 This history of radio news reporting recounts and assesses the contributions of radio toward keeping America informed since the 1920s It identifies distinct periods and milestones in broadcast journalism and includes a biographical dictionary of important figures who brought news to the airwaves Americans were dependent on radio for cheap entertainment during the Great Depression and for critical information during the Second World War when no other medium

could approach its speed and accessibility Radio's diminished influence in the age of television beginning in the 1950s is studied as the aural medium shifted from being at the core of many families activities to more specialized applications reaching narrowly defined listener bases Many people turned elsewhere for the news And now even TV is challenged by yet newer media The introduction of technological marvels throughout the past hundred years has significantly altered what Americans hear and how when and where they hear it
