Bubble Star:

From Luminous Hot Stars to Starburst Galaxies Peter S. Conti, Paul A. Crowther, Claus Leitherer, 2008-10-23

Luminous hot stars represent the extreme upper mass end of normal stellar evolution. Before exploding as supernovae they live out their lives of a few million years with prodigious outputs of radiation and stellar winds dramatically affecting both their evolution and environments. A detailed introduction to the topic, this book connects the astrophysics of massive stars with the extremes of galaxy evolution represented by starburst phenomena. A thorough discussion of the physical and wind parameters of massive stars is presented. HII galaxies, their connection to starburst galaxies, and the contribution of starburst phenomena to galaxy evolution through superwinds are explored. The book concludes with the wider cosmological implications, including Population III stars, Lyman break galaxies, and gamma ray bursts, for each of which massive stars are believed to play a crucial role. This book is ideal for graduate students and researchers in astrophysics interested in luminous hot stars and galaxy evolution.

The Infinite Holographic Quantum Physical Universe! J.E. Andersen, 2023-06-05
My name is J E Andersen and it is not my name you should hang yourself in, but my new 5 dimensional universal holographic quantum physics model. This story starts up in 1976 when I had an incredible out of body experience, opened my eyes to the paranormal side lying universe, and began exploring this experience. This led me to the right universal physics model, the physics model that I describe in my books. It was soon discovered that the 3 dimensional physics model would not be able to hold all the way. In 1986 I started a brand new hologram model which later turned out to reveal just the right active universe which is 5 dimensional in the active universal engine room. We can only see experience and detect the actual substance coming out of the very innermost field of this field system, the Higgs fields. The Higgs fields are located inside the atoms, but atoms can also be empty, i.e. without the Higgs fields, and then we are inside the famous stealth technology, the invisibility technology. Remember that it is atoms that are the building blocks of the universe. It is precisely this stealth technology that comes out of this 5 dimensional very active holographic quantum physics, which is the next big breakthrough in all types of research today. The fact that the universe is no longer just physical, leaves behind a universe that is totally 100% holographic and which is powered 100% by an active 5 dimensional quantum physics. There are no physical particles in this universe, only this holographic matter that can actually disappear and come back again, and now we have revealed stealth technology. Stealth technology is about the relationship between the atoms and the inner Higgs fields. The atoms can actually operate completely empty, and now this object can no longer be seen due to the lack of Higgs substance. This is more than interesting, this is also very exciting and completely new to you, because this is the truth about the creation of the universe, expansion, the unifying mass inside all gravitational fields, which turn into pressure cookers, and develop moons into planets, planets into gas planets, gas planets into stars, and the stars burn up the physical liquid plasma, transforming this plasma into the totally invisible starlight, and thus becomes a black hole. It is the gravitational fields that create shape and develop absolutely

What he has found has astounded him Hutchins farther poses the question if it took over 400 years of man s imagination from when the telescope was invented and countless other inventions including the Hubble and Spitzer space telescopes to merely take photo images of the universe then who s imagination is responsible for the reality those photo images represent As we peer through this doorway to the heavens and look upon these heavenly cosmic bodies we find ourselves awed by their grandeur The pressing question becomes too large to ignore Who is responsible for all these things Could it be that we are now peering into the mind of a supreme architect with an imagination far beyond that of mere mortals Could we be peering into the mind of imagination supreme Could it be that we have been brought to this point in history unbeknownst to ourselves and given this technology by the one who extended that ancient invitation recorded by Isaiah 2700 years ago

Our Monthly ,1873 Airfoil Design and Data Richard Eppler,2012-12-06 This book represents the latest state of my work on airfoils which began more than 30 years ago The major subject of this work was the continous development of a computer program which allows to solve the potential flow problem for given airfoils and to design airfoils from the properties of their velocity distributions After the solution of these potential flow analysis and design problems the boundary layers can be computed and the total lift drag and moment coefficients can be evaluated Several short and unpublished notes on this program were promoted by the US Airforce Academy in Colorado Springs with the support of R Gallington and W Smith A first complete description was published by the NASA Langley Research Center Ref 1 after had been invited to visit this center for four weeks in 1978 This was the beginnning of a very fruitful cooperation with Dan M Somers It led to another visit to the NASA Langley Center in 1979 during which several new options were added to the program and described in Ref 2 The NASA TM 1 contains a listing of the program which invited some smart people to retype it Obviously they ve been selling it for a lot of money However this early 1979 version should not be used anymore because it s missing ten years of development and improvements The latest version of the program is available from Universitat Stuttgart Inst
