**Pretense and Pathology** Bradley Armour-Garb, James A. Woodbridge,2015-07-24 In this book, Bradley Armour-Garb and James A. Woodbridge distinguish various species of fictionalism, locating and defending their own version of philosophical fictionalism. Addressing semantic and philosophical puzzles that arise from ordinary language, they consider such issues as the problem of non-being, plural identity, claims, mental attitude ascriptions, meaning, attributions, and truth talk. They consider deflationism about truth, explaining why deflationists should be fictionalists and show how their philosophical fictionalist account of truth talk underwrites a dissolution of the Liar Paradox and its kin. They further explore the semantic notions of reference and predicate satisfaction, showing how philosophical fictionalism can also resolve puzzles that these notions appear to present. Their critical examination of fictionalist approaches in philosophy, together with the development and application of their own brand of philosophical fictionalism, will be of great interest to scholars and upper-level students of philosophy of language, metaphysics, philosophical logic, philosophy of mind, epistemology, and linguistics.

**Selves** Galen Strawson, 2009-07-30 What is the self Does it exist If it does exist what is it like It s not clear that we even know what we re asking about when we ask these large metaphysical questions The idea of the self comes very naturally to us and it seems rather important but it s also extremely puzzling As for the word self it s been taken in so many different ways that it seems that you can mean more or less what you like by it and come up with almost any answer Galen Strawson proposes to approach the seeming problem of the self by starting from the thing that makes it seem there is a problem in the first place our experience of the self our experience of having or being a self a hidden inner mental presence or locus of consciousness He argues that we should consider the phenomenology experience of the self before we attempt its metaphysics its existence and nature And when we have considered what it s like for human beings assuming we can generalize about ourselves we need to consider what it might be like for other possible creatures what s the very least that might count as experience of oneself as a self This he proposes will give us a good idea of what we ought to be looking for when we go on to ask whether there is such a thing an idea worth following wherever it leads It leads Strawson to conclude that selves inner subjects of experience do indeed exist But they bear little resemblance to traditional conceptions of the self
