Weber to contemporary social theories and movements including feminism poststructuralism African American thought and queer theory Professor Seidman presents his approach to the tradition of sociological theory and its established canon Combining social analysis and moral advocacy *Contested Knowledge* shows how social theory can work within the public political sphere and can contribute to the making of a better world *Situating Social Theory* May, Tim, Powell, Jason, 2008-08-01 This edition examines the implications of recent developments challenges and disputes that have become important to debates in social theory including new commentaries on key authors It also explores the extent to which how we situate social theory may need re examining **Explorations in Classical Sociological Theory** Kenneth Allan, 2010

Explorations in Classical Sociological Theory Seeing the Social World Second Edition is an undergraduate sociological theory textbook that introduces the student to the major classical theorists including Marx Spencer Durkheim Weber Simmel Mead Schutz Gilman and Du Bois The theorists were chosen for the diversity of their perspectives as well as their ability to introduce the student to contemporary theory Kenneth Allan uses a lively informative writing style to engage the students in the eras of social change that spawned the major sociological theories and then applies them to the current era which also is experiencing major social change Features and benefits The book includes a glossary of terms Each of the theorist s important concepts are highlighted in the text and clear definitions provided in the glossary This feature is particularly important because theory is made up of terms and concepts and without the use of a glossary it is very easy for the undergraduate theory student to lose track of the terms and meanings While the book is organized primarily around the individual theorist s perspective a categorical scheme is also provided so the student can roughly situate the theorists and decide for themselves some of sociology s big questions The scheme provided in the book is not the one usually used by textbooks The more commonly used scheme conflict functional interaction hides some really important questions that the student needs to consider for example is society an object or does it exist only through interpretations The book provides an appendix with complete definitions of most of sociology s major perspectives e g critical theory including feminism race and queer theory postmodernism and so on exchange theory rational choice theory dramaturgy ethnomethodology structuration network theory ecological theory social phenomenology and so on The book introduces the power and poetry of theory by extensive use of original source material from the theorists writings *Contested Knowledge* Steven Seidman, 2008-03-11

This fourth edition includes an exploration of globalization and a new section on the theories of global and world order The author combines social analysis and moral advocacy to demonstrate how social theory can and does and sometimes doesn t work within the public and political sphere publisher description **Beginning classical social theory** Marcel Stoetzler, 2017-07-21 *Beginning classical social theory* introduces students and educated general readers to thirteen key social theorists by way of examining a single exemplary text by each author ranging from Comte to Adorno It answers the need for a book that helps students develop the skill to critically read theory Rather than learning how to admire the

canonical theorists readers are alerted to the flow of their arguments and the texts contradictions and limitations Having gotten under the skin of one key text by each author will provide readers with a solid starting point for further study The book will be suitable as the principal textbook in social theory modules as much as alongside a more conventional textbook as a recommended additional tool for self study It will appeal to undergraduate and postgraduate students as well as educated lay readers

Framing Social Theory Paola Rebughini, Enzo Colombo, 2022-08-31 This book proposes a reconstruction of contemporary social theory focusing on thematic issues rather than on authors or schools of thought In so doing it endeavours to bridge epistemological approaches and locate critical claims shared by the main trajectories and notions of sociological theoretical debate The book explores the current forms of social science theorization through the key themes of Agency Anthropocene Coloniality Intersectionality Othering Singularization Technoscience and Uncertainty Focusing on these key themes it highlights their usefulness for discussions of inequality neoliberalism eurocentrism androcentrism or anthropocentrism in order to examine these issues in a new light and look beyond the classic divides of social theory Intended for an academic audience interested in social theory scholars and post graduate students in sociology social sciences anthropology social geography social psychology and globalization studies will find this book useful The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
