

Situational context VS. linguistic context

1. **Situational context** refers to the particular **spatiotemporal situation** in which an utterance occurs, the main components of which include, apart from the place and time of the utterance, the speaker and the hearer, the actions they are performing at the time, the various objects and events existing in the situation.

2. **Linguistic context**, sometimes known as context, is concerned with the probability of a word's **co-occurrence or collocation** with another word, which forms part of the 'meaning' of the word, and also concerned with the part of text that **precedes and follows** a particular utterance.
