Deconvolution Peter A. Jansson, 1984 The Literature on deconvolution is rich with the contributions of many investigations These contributions are however scattered among journals devoted to numerous specialties No single volume has been available that provides both an overview and detail needed by a newcomer to this field [Deconvolution of Images and Spectra](#) Peter A. Jansson, 2012-06-13 Deconvolution is a technique in signal or image processing that is applied to recover information When it is employed it is usually because instrumental effects of spreading and blurring have obscured that information In 1996 *Deconvolution of Images and Spectra* was published Academic Press as a second edition of Jansson's 1984 book *Deconvolution with Applications in Spectroscopy* This landmark volume was first published to provide both an overview of the field and practical methods and results The present Dover edition is a corrected reprinting of the second edition It incorporates all the advantages of its predecessors by conveying a clear understanding of the field while providing a selection of effective practical techniques The authors assume only a working knowledge of calculus and emphasize practical applications over topics of theoretical interest focusing on areas that have been pivotal to the evolution of the most effective methods This tutorial is essentially self contained Readers will find it practical and easy to understand [Selected Applications of Modern FT-IR Techniques](#) Nishikida, 1996-08-01 This volume is intended to show beginners in modern Fourier Transform Infrared analysis which technique of infrared analysis should be selected and how to use it to obtain certain information from the most common samples brought into research and analytical laboratories in production industries
