**Deception's Fire** S. Donovan, Sandra Donovan, 1988-06 The Art and Science of Military Deception Hy Rothstein, Barton Whaley, 2013-09-01 It is said that deception among people in a civilized society is something to be loathed even though it seems to be part of human nature but deception in war is a virtue Properly designed and executed stratagems reduce the horrific costs of war This book is a comprehensive collection of classic articles on deception hand picked and expertly introduced by well known experts on military deception The purpose of this book is to set in motion a renaissance for using deception as an instrument of statecraft The various sections are designed to cumulatively provide sufficient breadth and depth on the subject to satisfy both the novice as well as the expert Packed with expert commentary interesting background information and original readings this book provides the reader with sufficient knowledge to pursue General Eisenhower's vision for the proper role of deception in support of the national interest *Climate of the Deception Creek* *Experimental Forest, Northern Idaho* Arnold I. Clark, William L. Mitchell, 2018-01-12 The chapters on the exercises are a treasure chest of material to work with covering a whole array of scenarios I think virtually every page and topic could spark robust and spirited classroom discussion starting with the text title itself Ronald W Vardy University of Houston Most students have very little or no background in this subject area so Clark's work is great to introduce students to intelligence and the analytical disciplines a really excellent book that fills a gaping hole in the public literature and is of genuinely great value to both students and practitioners Carl A Wege Professor Emeritus College of Coastal Georgia Bridging the divide between theory and practice Deception Counterdeception and Counterintelligence provides a thorough overview of the principles of deception and its uses in intelligence operations This masterful guide focuses on practical training in deception for both operational planners and intelligence analysts using a case based approach Authors Robert M Clark and William L Mitchell draw from years of professional experience to offer a fresh approach to the roles played by information technologies such as social media By reading and working through the exercises in this text operations planners will learn how to build and conduct a deception campaign and intelligence analysts will develop the ability to recognize deception and support deception

campaigns Key Features New channels for deception such as social media are explored to show readers how to conduct and detect deception activities through information technology Multichannel deception across the political military economic social infrastructure and information domains provides readers with insight into the variety of ways deception can be used as an instrument for gaining advantage in conflict Contemporary and historical cases simulate real world raw intelligence and provide readers with opportunities to use theory to create a successful deception operation A series of practical exercises encourages students to think critically about each situation The exercises have several possible answers and conflicting raw material is designed to lead readers to different answers depending on how the reader evaluates the material Individual and team assignments offer instructors the flexibility to proceed through the exercises in any order and assign exercises based on what works best for the classroom setup
