Routledge Handbook of Integrated Project Delivery Derek Walker, Steve Rowlinson, 2019-07-26

The concept of integrated project delivery (IPD) has evolved as a result of the need for highly expert teams of people to collaborate to deliver extremely complex projects to manage expectations about delivery speed, changes in governance standards and to take advantage of and manage expectations raised by rapid advances in technology. All this demands effective change management. This is the first Handbook to contextualise and thematically explore the concept with an emphasis on rigorous practical and theoretical validation. The Handbook is divided into five sections each with a focus on several interconnected themes including: An introduction to IPD concepts; The foundational elements and characteristics of IPD; People, culture and collaboration as key ingredients to successful and effective IPD; Technology and process aspects of relational contracting forms such as IPD; New and relevant perspectives to IPD that have received scant attention to date; Aspects and emerging issues that are rarely consciously

considered in traditional project delivery due to the commercial imperative that drives firms and client organisations The Handbook offers both discussions of these key themes and also in depth research into construction and other industry project procurement and delivery that spans decades In addition the Handbook presents best and better practice but also includes insights into cutting edge experimental developments in technology and practices where proof of concept is currently being developed into emerging practice Contributing authors in this Handbook collaborate with the co editors to draw together an integrated set of chapters that align to deliver a coherent narrative of the IPD concept It is an invaluable reference for practitioners and academics alike and useful as core course content for numerous degree programs of study and professional development courses

Employee Relations John Gennard, Graham Judge, 2005 Written by the Chief Examiner and Associate Examiner for employee relations for the CIPD the new edition of this best selling text has been written specifically to cater for the CIPD s Employee Relations elective Offering a highly practical and accessible overview of the impact of the economic corporate and legal environment on employee relations it is also suitable for students taking an employee industrial relations module on an HR or business degree programme at undergraduate or postgraduate level TARGETED AT Students studying CIPD Professional Qualifications and undergraduate and post graduate students on employee relations modules on business and HRM courses
