Course In Computational Probability And Statistics:

A Course in Computational Probability and Statistics Walter Freiberger,Ulf Grenander,2012-12-06 This book arose out of a number of different contexts and numerous persons have contributed to its conception and development It had its origin in a project initiated jointly with the IBM Cambridge Scien tific Center particularly with Dr Rhett Tsao then of that Center We are grateful to Mr Norman Rasmussen Manager of the IBM Scientific Center Complex for his initial support The work is being carried on at Brown University with generous support from the Office of Computing Activities of the National Science Foundation grants GJ 174 and GJ 7l0 we are grateful to Dr John Lehmann of this Office for his interest and encouragement Professors Donald McClure and Richard Vitale of the Division of Applied Mathematics at Brown University contributed greatly to the project and taught courses in its spirit We are indebted to them and to Dr Tore Dalenius of the University of Stockholm for helpful criticisms of the manuscript The final stimulus to the book s completion came from an invLtation to teach a course at the IBM European Systems Research Institute at Geneva We are grateful to Dr J F Blackburn Director of the Institute for his invitation and to him and his wife Beverley for their hospitality We are greatly indebted to Mrs Katrina Avery for her splendid secretarial and editorial work on the manuscript   **A Short Course in Computational Probability and Statistics** Walter F. Freiberger,Ulf Grenander,1971   A Course in Computational Probability and Statistics ,1971   Combinatorial Methods Jerome K. Percus,1971-12-01 It is not a large overstatement to claim that mathematics has traditionally arisen from attempts to understand quite concrete events in the physical world The accelerated sophistication of the mathematical community has perhaps obscured this fact especially during the present century with the abstract becoming the hallmark of much of respectable mathematics As a result of the inaccessibility of such work practicing scientists have often been compelled to fashion their own mathematical tools blissfully unaware of their prior existence in far too elegant and far too general form But the mathematical sophistication of scientists has grown rapidly too as has the scientific sophistication of many mathematicians and the real worl suitably defined is once more serving its traditional role One of the fields most enriched by this infusion has been that of combinatorics This book has been written in a way as a tribute to those natural scientists whose breadth of vision has inparted a new vitality to a dormant giant The present text arose out of a course in Combinatorial Methods given by the writer at the Courant Institute during 1967 68 Its structure has been determined by an attempt to reach an informed but heterogeneous group of students in mathematics physics and chemistry Its lucidity has been enhanced immeasurably by the need to satisfy a very resolute critic Professor Ora E Percus who is responsible for the original lecture notes as well as for their major modifications   A Course in Computational Probability and Statistics Walter Freiberger,Ulf Grenander,1977-07-12   *Handbook of Mathematics* Ilja N.
