Thomas Michael Power, Richard Barrett

Cowboy Economics:

Post-Cowboy Economics Thomas Michael Power, Richard Barrett, 2001-07-01 A great deal of reactionary political fire in the Mountain West has been aimed at environmental protection measures that are perceived to have destroyed or diminished the livelihoods of long time residents Conventional wisdom sees the economic woes afflicting the region declining pay growing inequality persistent poverty as a direct result of increasingly strict environmental regulations that have crippled natural resource industries such as mining and logging In *Post Cowboy Economics* economists Thomas Michael Power and Richard Barrett provide a new interpretation of the economy of the Mountain West Based on evidence from a wide variety of sources including data on individual employment and income histories of more than 300 000 residents they clearly demonstrate that the region s economic misfortunes are not the result of changes in regional industrial structure but rather are local manifestations of pervasive national and international trends The authors discuss and critique entrenched conventional wisdom and its policy implications present an empirical analysis of changes in the region offer a new interpretation of events affecting the regional economy set forth public policies that will work to protect and enhance the economic well being of its residents and communities The authors analysis and interpretation make a compelling case that despite incomes that are low compared to the rest of the country the region is not suffering from general impoverishment and that environmental protection rather than threatening economic well being enhances welfare and protects the very source of the economic vitality that the Mountain West enjoys Throughout they argue that fearful crisis driven environmental and economic development policies are unnecessary and inappropriate and often counterproductive *Post Cowboy Economics* is an important work for professionals and scholars involved with environmental policy economic development and resource management as well as anyone interested in the future of the American West

Cowboy Economics Jim F. Blake, Carl M. Colonna, 2009-04 *Cowboy Economics of Meeteetse and the Big Horn Basin Wyoming* It is a review of historical literature on the early settlement of Meeteetse in the Big Horn Basin which was at a time in the northern part of Fremont County

Cowboy Economics Harold L. Oppenheimer, 1976

Ecological Economics Michael Common, Sigrid Stagl, 2005-10-06 Taking as its starting point the interdependence of the economy and the natural environment this book provides a comprehensive introduction to the emerging field of ecological economics The authors who have written extensively on the economics of sustainability build on insights from both mainstream economics and ecological sciences Part I explores the interdependence of the modern economy and its environment while Part II focuses mainly on the economy and on economics Part III looks at how national governments set policy targets and the instruments used to pursue those targets Part IV examines international trade and institutions and two major global threats to sustainability climate change and biodiversity loss Assuming no prior knowledge of economics this textbook is well suited for use on interdisciplinary environmental science and management courses It has extensive student friendly features including discussion questions and exercises keyword

Economic Values and the Natural World
David William Pearce, Jules N. Pretty, 1993 The author looks at the challenge facing agriculture today and details the concepts and characteristics of alternative sustainable agricultural practices Empirical evidence from a diverse range of agro ecological and community setting show the impact of more sustainable practices In addition existing policy frameworks and institutional processes are considered and alternatives which are known to work are presented

'Cowboy Economics' Versus 'Spaceship Ecology'
Joshua Chad Gellers, 2013 In order to improve and protect the environment while keeping in mind economic realities that constrain action it is essential to devise an ethical approach amenable to both economics and environmental ethics This paper endeavors to provide a framework for achieving such a compromise by 1 Defining critical tenets of neoclassical economics and deep ecology 2 Reframing the policy problem 3 Reviewing the weaknesses of regulative normative and cognitive institutionalist perspectives on economics and the environment and 4 Suggesting a normative analytical framework that allows for a dialogue between economics and environmental ethics I conclude that a more sustainable environmental ethic which promotes both efficiency and justice should be based on three principles regulation education and participation

Living within Limits
Garrett Hardin, 1995-04-06 We fail to mandate economic sanity writes Garrett Hardin because our brains are addled by compassion With such startling assertions Hardin has cut a swathe through the field of ecology for decades winning a reputation as a fearless and original thinker A prominent biologist ecological philosopher and keen student of human population control Hardin now offers the finest summation of his work to date with an eloquent argument for accepting the limits of the earth s resources and the hard choices we must make to live within them In Living Within Limits Hardin focuses on the neglected problem of overpopulation making a forceful case for dramatically changing the way we live in and manage our world Our world itself he writes is in the dilemma of the lifeboat it can only hold a certain number of people before it sinks not everyone can be saved The old idea of progress and limitless growth misses the point that the earth and each part of it has a limited carrying capacity sentimentality should not cloud our ability to take necessary steps to limit population But Hardin refutes the notion that goodwill and voluntary restraints will be enough Instead nations where population is growing must suffer the consequences alone Too often he writes we operate on the faulty principle of shared costs matched with private profits In Hardin s famous essay The Tragedy of the Commons he showed how a village common pasture suffers from overgrazing because each villager puts as many cattle on it as possible since the costs of grazing are shared by everyone but the profits go to the individual The metaphor applies to global ecology he argues making a powerful case for closed borders and an end to immigration from poor nations to rich ones The production of human beings is the result of very localized human actions corrective action must be local Globalizing the population problem would only ensure that it would never be solved Hardin does not shrink from the startling implications of his argument as he criticizes the shipment of food to overpopulated regions and asserts that coercion in population control is

inevitable But he also proposes a free flow of information across boundaries to allow each state to help itself The time honored practice of pollute and move on is no longer acceptable Hardin tells us We now fill the globe and we have no where else to go In this powerful book one of our leading ecological philosophers points out the hard choices we must make and the solutions we have been afraid to consider *Environmental Economics: A Textbook* Karpagam M.,1991 **Environmental Literacy in Science and Society** Roland W. Scholz,Claudia R. Binder,2011-07-21 In an era where humans affect virtually all of the earth s processes questions arise about whether we have sufficient knowledge of human environment interactions How can we sustain the Earth s ecosystems to prevent collapses and what roles should practitioners and scientists play in this process These are the issues central to the concept of environmental literacy This unique book provides a comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development Approaching the topic from multiple perspectives it explores the development of human understanding of the environment and human environment interactions in the fields of biology psychology sociology economics and industrial ecology The discussion emphasises the importance of knowledge integration and transdisciplinary processes as key strategies for understanding complex human environment systems HES In addition the author defines the HES framework as a template for investigating sustainably coupled human environment systems in the 21st century **Discovering Eve** Carol Meyers,1991-01-10 This groundbreaking study looks beyond biblical texts which have had a powerful influence over our views of women s roles and worth in order to reconstruct the typical everyday lives of women in ancient Israel Meyers argues that biblical sources alone do not give a true picture of ancient Israelite women because urban elite males wrote the vast majority of the scriptural texts and the stories of women in the Bible concern exceptional individuals rather than ordinary Israelite women Analyzing the biblical material in light of recent archaeological discoveries about rural village life in ancient Palestine Meyers depicts Israelite women not as submissive chattel in an oppressive patriarchy but rather as strong and significant actors within their families and society **Caribbean Ecology and Economics** Norman Girvan,1991 *Ecological Economics and Sustainable Development* Herman E. Daly,1991 **Cowboy Capitalism** Olaf Gersemann,2005-08-15 Europeans believe that while the U S economy may create more growth they have it better when it comes to job security income equality and other factors Gersemann a German reporter went to America and found that the greater market freedoms in America create a more flexible adaptable and prosperous system than the declining welfare states of old Europe This book presents statistical data in extensive yet accessible charts and graphs **Technology Review** ,1981-04 **Economics** Tom Riddell,Jean A. Shackelford,1987 **Economics, edited by F. R. Glahe** Kenneth Ewart Boulding,1971 Congressional Record United States. Congress,1981 Natural Resource and Environmental Economics Roger Perman,Yue Ma,James McGilvray,1996 Environmental economics is one of the fastest growing areas of economics It establishes the true cost of natural resources including the costs of clean water and fresh air and discusses

ways in which these costs can then be distributed among consumers This completely new textbook combines rigorous economic theory with its practical application in the environment to provide the most up to date and thorough coverage of the subject The author introduces input output models and general equilibrium analysis of environmental policy which is unique in an environmental economic text at this level and illustrates the text with real life case studies Los Angeles Peru Eastern Europe
