## Analyzing Systems:

**Micro Total Analysis Systems 2000** Albert van den Berg, Wouter Olthuis, Piet Bergveld, 2013-11-11 After earlier meetings in Enschede NL 1994 Basel CH 1996 and Banff CDN 1998 muTAS 2000 is the fourth international symposium on the subject of miniaturized techniques methods devices and systems for bio chemical analysis and synthesis Initially started as a minor sub topic in the large field of Micro System Technology MST or MEMS the field of muTAS is currently generally considered as one of the most important application areas of MST which is reflected in the still rapidly growing research development and above all commercialization activities Apart from further development and refining of the research on electrophoretic separation electrokinetically driven flow systems cell manipulation and analysis miniaturized flow systems and study of microfluidics the important new area of centrifugal microfluidics on CD devices receives broad attention On the other hand new innovations range from topics as exotic as photoacoustic detection in microreactors and molecular emission detection on a chip to very high pressure microreactor devices and shear flow driven separations The enormous speed of the developments in this field is illustrated by the large number of new start up companies some of them based upon technologies that were not even published at the former meeting in Banff in 1998 All this illustrates the great excitement that continues to govern this field in which generation and analysis of bio chemical information using microtechnology becomes more and more entangled in what one could call micro bio chemical systems This volume contains the proceedings of the fourth international symposium on Micro Total Analysis Systems muTAS 2000 held 14 18 May 2000 at the University of Twente in Enschede The Netherlands and organised by the MESA Research Institute Cutting edge research of all invited and contributed papers presented by the world s leading TAS groups provide the newest state of the art of this electrifying multidisciplinary field

**Micro Total Analysis Systems 2002** Yoshinobu Baba, Shuichi Shoji, Albert van den Berg, 2012-12-06 The Sixth International Conference on Miniaturized Chemical and Biochemical Analysis Systems known as IITAS2002 will be fully dedicated to the latest scientific and technological developments in the field of miniaturized devices and systems for realizing not only chemical and biochemical analysis but also synthesis The first IITAS meeting was held in Enschede in 1994 with approximately 160 participants bringing together the scientists with background in analytical and biochemistry with those with Micro Electro Mechanical Systems MEMS in one workshop We are grateful to Piet Bergveld and Albert van den Berg of MESA Research Institute of the University of Twente for their great efforts to arrange this exciting first meeting The policy of the meeting was succeeded by late Prof Dr Michael Widmer in the second meeting IITAS 96 held in Basel with 275 participants The first two meetings were held as informal workshops From the third workshop IITAS 98 420 participants held in Banff the workshop had become a worldwide conference Participants continued to increase in IITAS2000 about 500 participants held in Enschede and IITAS2001 about 700 participants held in Monterey The number of submitted papers also dramatically increased in this period from 130 in 1998 230 in 2000 to nearly 400 in 2001 From 2001 IITAS became an annual

symposium The steering committee meeting held in Monterey confirmed the policy of former ITAS that quality rather than quantity would be the key point and that the parallel session format throughout the 3
