*The Amateur's Mind* Jeremy Silman, 1999 This book takes the student on a journey through his own mind and returns him to the chess board with a wealth of new found knowledge and the promise of a significant gain in strength Most amateurs possess erroneous thinking processes that remain with them throughout their chess lives These flaws in their mental armour result in stinging defeats and painful reversals Books can be bought and studied lessons can be taken but in the end these elusive problems always prove to be extremely difficult to eradicate Seeking a solution to this dilemma the author wrote down the thoughts of his students while they played actual games analysed them and catalogued the most common misconceptions that arose This second edition greatly expands on the information contained in the popular first edition

**Amateurs, Professionals, and Serious Leisure** Robert A. Stebbins, 1992-04-06 Throughout this project Stebbins has built on the work of Barney Glaser and Anselm Strauss and their notion of grounded theory First Stebbins extensively observed the routine activities of amateurs and professionals in each field studied Then as he became more familiar with the life styles of the participants he conducted lengthy unstructured face to face interviews with in most cases thirty amateur or professional respondents Each field demanded special methods of observation analysis interviewing probing and reporting As much as possible however Stebbins asked similar questions of all respondents in all fields so as to permit generalizations across these diverse fields The result was a substantive grounded theory of each field studied In *Amateurs Professionals and Serious Leisure* Stebbins has developed a formal grounded theory of amateurs and professionals based on the research accumulated in all eight substantive fields By transcending a variety of contexts he argues one can gain a more enduring appreciation of the elements that affect peoples experiences in work and leisure pursuits A thorough review of the findings across this wide range of activities including his findings and ideas on hobbyists and career volunteers enabled Stebbins to derive better definitions of the main concepts of the project such as amateur the public and serious leisure as well as professional where he distinguishes between client centred and public centred professionals who while sharing numerous ideal typical attributes vary as to the power and control they have over their work

in a democratic society He presents inductive conclusions about careers and the costs and rewards in the eight amateur professional fields considered He examines the external world of amateurs and professionals in the light of such issues as family ties relations among amateurs and professionals and among amateurs and their employers public images critics and journalists community contributions and the question of marginality for amateurs who are caught between the work world of the professional and the casual leisure world of the majority of the population He concludes with an exploration of the future role of serious leisure in relation to predictions of greater unemployment and increased leisure time and longevity Mind and Body ,1913 **Amateurs** Robert A.
