Beyond Subsistence:

Sociological Theory Beyond the Canon Syed Farid Alatas, Vineeta Sinha, 2017-05-27 This book expands the sociological canon by introducing non Western and female voices and subjects the existing canon itself to critique Including chapters on both the founding fathers of sociology and neglected thinkers it highlights the biases of Eurocentrism and androcentrism while also offering much needed correctives to them The authors challenge a dominant account of the development of sociological theory which would have us believe that it was only Western European and later North American white males in the nineteenth and early twentieth century who thought in a creative and systematic manner about the origins and nature of the emerging modernity of their time This integrated and contextualised account seeks to restructure the ways in which we theorise the emergence of the classical sociological canon This book s global scope fills a significant lacuna and provides a unique teaching resource to students of classical sociological theory

Beyond Marx, 2013-11-21 Capitalism has proven much more resilient than Marx anticipated and the working class has until now hardly lived up to his hopes The Marxian concept of class rests on exclusion Only the pure doubly free wage workers are able to create value from a strategic perspective all other parts of the world s working populations are secondary But global labour history suggests that slaves and other unfree workers are an essential component of the capitalist economy What might a critique of the political economy of labour look like that critically reviews the experiences of the past five hundred years while moving beyond Eurocentrism In this volume twenty two authors offer their thoughts on this question both from a historical and theoretical perspective Contributors include Riccardo Bellofiore Sergio Bologna C George Caffentzis Silvia Federici Niklas Frykman Ferruccio Gambino Detlef Hartmann Max Henninger Thomas Kuczynski Marcel van der Linden Peter Linebaugh Ahlrich Meyer Maria Mies Jean Louis Prat Marcus Rediker Karl Heinz Roth Devi Sacchetto Subir Sinha Massimiliano Tomba Carlo Vercellone Peter Way Steve Wright

Keynes, Beveridge and Beyond Tony Cutler, John Williams, Karel Williams, 2013-11-05 Presenting a coherent interpretation of the development of economic and social policy in Britain since 1945 this book analyses the political assumptions underlying post war economic policy It traces these assumptions through the classic texts of Keynes and Beveridge the architects of limited non socialist state intervention to secure the welfare state and full employment Topics covered include Private saving versus company pensions The level and composition of employment in Britain

Capabilities in a Just Society Rutger Claassen, 2018-10-04 What sort of entitlements should citizens have in a just society In this book Rutger Claassen sets out a theory of what he terms navigational agency whereby citizens should be able to navigate freely between social practices This shows how individuals can be at the same time free and autonomous in striving for their own goals in life but also embedded in social practices in which they have to cooperate with others He argues that for navigational agency people need three sets of core capabilities those which allow human empowerment in civil society a decent level of socio economic subsistence and political participation in democratic decision

making procedures The idea of navigational agency the book argues provides an alternative to currently dominant versions of the capability approach to social justice and strengthens its liberal foundations Public Finance and Public Policy Arye L. Hillman, 2003-07-28 Sample Text **The Earth Is the Lord's** Liam de los Reyes, 2025-06-17 What does the Christian tradition have to say about property and ownership The Earth Is the Lord's offers compelling answers to this question In this timely and thought provoking book author Liam de los Reyes presents a counterpoint from within the Christian tradition to both Lockean and utilitarian theories of property Combining strong textual evidence and clear reasoning de los Reyes sets forth a natural law theory of property based on key patristic scholastic early modern and contemporary theological sources This theory posits that all things belong properly to God that God has given human beings the power to use the things of the world for their own flourishing and that property as a convention ought to govern and distribute the things of the world in accordance with this divine purpose More specifically de los Reyes argues that within the Christian tradition property is a convention that gives expression to the political nature of humans by protecting certain principles of justice in how humans govern the material order while leaving the determination of any one property regime open to a people's political reasoning that takes into account that people's historical cultural and environmental contexts De los Reyes's theory is general enough to support a wide array of philosophical and theological theories of justice but also concrete enough to clarify many of the related critiques of capitalism and markets making it of particular interest to scholars of ethics religion philosophy law and economics **Beyond the Black Ocean** Thomas McGrady, 1901 **Atlantic Monthly**, 1896 **Journal of the Dublin Statistical Society**, 1855 Karl Marx Achille Loria, 1920 **Archaeology on the Great Plains** W.
