Beyond Numeracy John Allen Paulos,2013-05-29 From the author of the national bestseller Innumeracy a delightful exploration and explanation of mathematical concepts from algebra to zero in easily accessible alphabetical entries Paulos does for mathematics what *The Joy of Sex* did for the boudoir Washington Post Book World First time in paperback

Beyond the Quadratic Formula Ron Irving,2020-01-29 The quadratic formula for the solution of quadratic equations was discovered independently by scholars in many ancient cultures and is familiar to everyone Less well known are formulas for solutions of cubic and quartic equations whose discovery was the high point of 16th century mathematics Their study forms the heart of this book as part of the broader theme that a polynomial's coefficients can be used to obtain detailed information on its roots The book is designed for self study with many results presented as exercises and some supplemented by outlines for solution The intended audience includes in service and prospective secondary mathematics teachers high school students eager to go beyond the standard curriculum undergraduates who desire an in depth look at a topic they may have unwittingly skipped over and the mathematically curious who wish to do some work to unlock the mysteries of this beautiful subject

The Beyond Trilogy Michael Phillips,2018-07-01 All three novels in the devotional author's Christian fantasy saga inspired by the works of George MacDonald and C S Lewis *The Garden at the Edge of Beyond* When a middle aged man embarks on an enlightening and dreamlike theological journey he awakens to a new reality with a profound new outlook on life *Heaven and Beyond* When a tragedy ends a man's mortal life his journey through eternity begins *Traveling across the realms of heaven and earth* his notions of each are turned upside down *Hell and Beyond* A prominent atheist dies unexpectedly and goes to hell Or so it appears but nothing is what it seems in this engrossing allegorical novel about the afterlife *Self-Similarity and Beyond* P.L. Love,William Wimsatt,2019-09-03 Interdisciplinary perspectives on cultural evolution that reject meme theory in favor of a complex understanding of dynamic change over time How do cultures change In recent decades the concept of the meme posited as a basic unit of culture analogous to the gene has been central to debates about cultural transformation Despite the appeal of meme theory its simplification of complex interactions and other inadequacies as an explanatory

framework raise more questions about cultural evolution than it answers In *Beyond the Meme* William C Wimsatt and Alan C Love assemble interdisciplinary perspectives on cultural evolution providing a nuanced understanding of it as a process in which dynamic structures interact on different scales of size and time By focusing on the full range of evolutionary processes across distinct contexts from rice farming to scientific reasoning this volume demonstrates how a thick understanding of change in culture emerges from multiple disciplinary vantage points each of which is required to understand cultural evolution in all its complexity The editors provide an extensive introductory essay to contextualize the volume and Wimsatt contributes a separate chapter that systematically organizes the conceptual geography of cultural processes and phenomena Any adequate account of the transmission elaboration and evolution of culture must this volume argues recognize the central roles that cognitive and social development play in cultural change and the complex interplay of technological organizational and institutional structures needed to enable and coordinate these processes Contributors Marshall Abrams U of Alabama at Birmingham Claes Andersson Chalmers U of Technology Mark A Bedau Reed College James A Evans U of Chicago Jacob G Foster U of California Los Angeles Michel Janssen U of Minnesota Sabina Leonelli U of Exeter Massimo Maiocchi U of Chicago Joseph D Martin U of Cambridge Salikoko S Mufwene U of Chicago Nancy J Nersessian Georgia Institute of Technology and Harvard U Paul E Smaldino U of California Merced Anton T rnrberg U of Gothenburg Petter T rnrberg U of Amsterdam Gilbert B Tostevin U of Minnesota
