*Assessing Financial Access in Brazil* Anjali Kumar, 2005-01-01 Access to financial services in Brazil has been relatively stable over the past ten years despite the banking sector contraction of the late 1990s Wide geographic variations in the supply of banking services by region and municipality are partly explained by differentials in income and population density On a cross country basis Brazil does not appear to be underbanked Looking at the use of financial services by different groups of consumers in Brazil differences in financial access across regions is confirmed but differences among richer and poorer neighborhoods can be as important Public financial institutions in Brazil deemed to be socially responsible appear to have served disadvantaged groups more than private banks on some measures and for some services However their role varies by type of service and in the case of some services public banks in fact may have better served the better off groups At the level of individuals the most important determinants of access to financial services are socio economic characteristics such as income wealth and education This may signify that in the presence of asymmetric information access to such services depends critically on client information and such characteristics provide a proxy for creditworthiness

broadening access to credit in Latin America These experiences are consistent with an emerging new view that while recognizing the central role of the public sector in improving the contractual and informational environment for financial markets also contends that there might be room for well designed restricted interventions in collaboration with the private sector to foster the development of financial markets and broaden access to them In particular the book analyzes among other things some interesting experiences from Brazil Chile Colombia and Mexico that use different instruments to broaden access to credit in a sustainable way such as structured finance factoring credit guarantees and correspondent banking Most of these experiences have led to financial innovation by developing new financial products and coordinating different players in the financial and real sectors to overcome barriers to access to credit The book provides a first systematic analysis of these innovative experiences including an analytical framework to understand problems of access to finance and a discussion of the effects and optimal design of public interventions Finally the book discusses some open policy questions about the role of the private and public sectors including state owned banks in broadening access to finance in a sustainable and market friendly manner
