Negative Actions Jonathan D. Payton,2021-02-25 Negative actions intentional omissions refrainments etc seem to be genuine actions The standard metaphysical theories of action are event based they treat actions as events of a special kind But it seems that many and perhaps all negative actions are not events but absences thereof In this book I provide a comprehensive treatment of this problem and its solution I trace the appearance that negative actions are mere absences to the widely assumed view that negative action sentences sentences which describe an agent as omitting refraining etc are negative existentials reporting the non occurrence of an event of a certain kind I argue on the contrary that such sentences report the occurrence of an event not the absence of one Moreover I show how these events can be identified with ordinary positive events of the sort we should already have in our ontology In developing these views I provide a comprehensive picture of the metaphysics of negative actions the nature of our thought and talk about them and their place in a theory of action and agency
