Signifying Pain Judith Harris,2012-02-01 A deeply personal yet universal work *Signifying Pain* applies the principles of therapeutic writing to such painful life experiences as mental illness suicide racism domestic abuse and even genocide Probing deep into the bedrock of literary imagination Judith Harris traces the odyssey of a diverse group of writers John Keats Derek Walcott Jane Kenyon Michael S Harper Robert Lowell and Ai as well as student writers who have used their writing to work through and past such personal traumas Drawing on her own experience as a poet and teacher Harris shows how the process can be long and arduous but that when exercised within the spirit of one s own personal compassion the results can be limitless *Signifying Pain* will be of interest not only to teachers of creative and therapeutic writing but also to those with a critical interest in autobiographical or confessional writing more generally *Flat-World Fiction* Liliana M. Naydan,2021-12-15 *Flat World Fiction* analyzes representations of digital technology and the social and ethical concerns it creates in mainstream literary American fiction and fiction written about the United States in the first two decades of the twenty first century In this period authors such as Don DeLillo Jennifer Egan Dave Eggers Joshua Ferris Jonathan Safran Foer Mohsin Hamid Thomas Pynchon Kristen Roupenian Gary Shteyngart and Zadie Smith found themselves not only implicated in the developing digital world of flat screens but also threatened by it while simultaneously attempting to critique it As a result their texts explore how human relationships with digital devices and media transform human identity and human relationships with one another history divinity capitalism and nationality Liliana M Naydan walks us through these complex relationships revealing how authors show through their fiction that technology is political In the process these

authors complement and expand on work by historians philosophers and social scientists creating accessible literary road maps to our digital future
