Digital Libraries David Stern,1999 Digital Libraries provides librarians and information professionals with an overview of selected directions trends possibilities limitations enhancements design principles and ongoing projects for integrated library and information systems Covering issues in the areas of public service collection development and technical design this book will help beginners and professionals in the field choose the best suited technologies for their library Research and Technology Advances in Digital Libraries ,1999 Proceedings of a May 1999 forum on current issues in digital library research and technology Papers are divided in sections on ontology and structure database querying and mining video mathematics and musical applications text and information retrieval and metadata Discussion encompasses area *Digital Libraries* Sadia Vancauwenbergh,2021-06-30 Over the past decades traditional academic library environments have transformed into digital libraries This has resulted in many challenges for libraries in terms of the reinvention of libraries roles and organizations the skill sets of librarians and library infrastructure At the same time this profound transformation has opened the door to many new avenues such as the support and advancement of Open Science This book offers insights into the transformation of traditional library environments to digital libraries and details how digital libraries can contribute to Open Science in particular to Open Access FAIR and Open Data and Open Education by describing methods criteria strengths and weaknesses as well as applications Digital Library Technologies Edward A. Fox,Ricardo da Silva Torres,2014-03-01 Digital libraries DLs have introduced new technologies as well as leveraging enhancing and integrating related technologies since the early 1990s These efforts have been enriched through a formal approach e g the 5S Societies Scenarios Spaces Structures Streams framework which is discussed in two earlier volumes in this series This volume should help advance work not only in DLs but also in the WWW and other information systems Drawing upon four Kozievitch Murthy Park Yang completed and three Elsherbiny Farag Srinivasan in process dissertations as well as the efforts of collaborating researchers and scores of related publications presentations tutorials and reports this book should advance the DL field with regard to at least six key technologies By integrating surveys of the state of the art new research connections with formalization case studies and exercises projects this book can serve as a computing or information science textbook It can support studies in cyber security document management hypertext hypermedia IR knowledge management LIS multimedia and machine learning Chapter 1 with a case study on fingerprint collections focuses on complex composite compound objects connecting DL and related work on buckets DCC and OAI ORE Chapter 2 discussing annotations as in hypertext hypermedia emphasizes parts of documents including images as well as text managing superimposed information The SuperIDR system

and prototype efforts with Flickr should motivate further development and standardization related to annotation which would benefit all DL and WWW users Chapter 3 on ontologies explains how they help with browsing query expansion focused crawling and classification This chapter connects DLs with the Semantic Web and uses CTRnet as an example Chapter 4 on hierarchical classification leverages LIS theory as well as machine learning and is important for DLs as well as the WWW Chapter 5 on extraction from text covers document segmentation as well as how to construct a database from heterogeneous collections of references from ETDs i e converting strings to canonical forms Chapter 6 surveys the security approaches used in information systems and explains how those approaches can apply to digital libraries which are not fully open Given this rich content those interested in DLs will be able to find solutions to key problems using the right technologies and methods We hope this book will help show how formal approaches can enhance the development of suitable technologies and how they can be better integrated with DLs and other information systems

A Survey of Complex Object Technologies for Digital Libraries Michael Lawrence Nelson,2001 [How to Build a Digital Library](#) Ian H. Witten,David I

Bainbridge,2002-07 While there are several books devoted to specific issues relating to digital libraries How to Build a Digital Library is the only one to equip readers with all the knowledge and the tools they need to construct and maintain one Designed for a diverse audience the methodology is supported by a wide range of examples and can be adapted to any size project

Key Issues Regarding Digital Libraries Rao Shen,Marcos Andre Goncalves,Edward A. Fox,2013-02-01 This is the second book based on the 5S Societies Scenarios Spaces Structures Streams approach to digital libraries DLs Leveraging the first volume on Theoretical Foundations we focus on the key issues of evaluation and integration These cross cutting issues serve as a bridge for those interested in DLs connecting the introduction and formal discussion in the first book with the coverage of key technologies in the third book and of illustrative applications in the fourth book These two topics have central importance in the DL field allowing it to be treated scientifically as well as practically In the scholarly world we only really understand something if we know how to measure and evaluate it In the Internet era of distributed information systems we only can be practical at scale if we integrate across both systems and their associated content Evaluation of DLs must take place at multiple levels so we can address the different entities and their associated measures Thus for digital objects we assess accessibility pertinence preservability relevance significance similarity and timeliness Other measures are specific to higher level constructs like metadata collections catalogs repositories and services We tie these together through a case study of the 5SQual tool which we designed and implemented to perform an automatic quantitative evaluation of DLs Thus across the Information Life Cycle we describe metrics and software useful to assess the quality of DLs and demonstrate utility with regard to representative application areas archaeology and education Though integration has been a challenge since the earliest work on DLs we provide the first comprehensive 5S based formal description of the DL integration problem cast in the context of related work Since archaeology is a fundamentally distributed enterprise we describe ETANADL for

integrating Near Eastern Archeology sites and information Thus we show how 5S based modeling can lead to integrated services and content While the first book adopts a minimalist and formal approach to DLs and provides a systematic and functional method to design and implement DL exploring services here we broaden to practical DLs with richer metamodels demonstrating the power of 5S for integration and evaluation [Towards Interoperability in Digital Libraries Overview and Selected Highlights of the Stanford Digital Library Project](#) Andreas Paepcke,Stanford University. Ketchpel,Martin Roscheisen,Terry Winograd,1997 Abstract We outline the five main research thrusts of the Stanford Digital Library project and we describe technical details for two specific efforts that have been realized in prototype implementations First we describe how we employ distributed object technology to cope with interoperability among emerging digital library services In particular we describe how we use CORBA objects as wrappers to handle differences in service interaction models and we sketch an information access protocol that takes advantage of distributed object environments The second effort we cover is InterPay a framework and protocol for payment among autonomous services The framework addresses interoperability problems in online payment by cleanly separating information access protocols payment and charging policies and the actual mechanics of individual financial transactions [Library of Congress Subject Headings](#) Library of Congress,2013 **Research and Advanced Technology for Digital Libraries** ,1999 **Semantic digital libraries** Sebastian Ryszard Kruk,2010 [Library of Congress Subject Headings](#) Library of Congress.
