Carpenter,HUMAN RESOURCES RESEARCH ORGANIZATION ALEXANDRIA VA.,1967 The aim of the course is to provide understanding of fundamental computer programming concepts and more important to develop a proficiency in writing elementary computer programs The material was originally drawn from the U S Army s course for the Automatic Data Processing Specialist ADPS Programing Specialist MOS 745 1 The criterion problems

contained in the course were chosen from actual job situations but scaled down to fit the instructional repertoire of the course. The course is self-contained and consists of an instruction booklet and an answer booklet. It is directed toward the level of high school seniors and first-year college students. In its various experimental forms, it was administered to a total of nearly 900 high school juniors and seniors and, after final revision, to a small sample of college freshmen and high school seniors. Findings from the several experimental administrations of the course clearly pointed to the desirability of teaching the course with a variety of kinds of computer problems. Results indicated that students learned from making errors and thus required hints or correct answers in solving the practice problems only a small part of the time.

Author: Beginning Microsoft Small Basic Philip Conrod, Lou Tylee, 2010. The BEGINNING MICROSOFT SMALL BASIC programming and porting tutorial is an interactive self-study tutorial explaining in depth the new Microsoft Small Basic development environment using many Small Basic program examples. This course is written for the absolute beginner programmer and can be used by kids 13 as well as adults. The BEGINNING MICROSOFT SMALL BASIC programming and porting tutorial consists of 11 chapters explaining in simple, easy-to-follow terms how to build Small Basic applications and then compare them to other programming languages. You will learn about program design, text window applications, graphics window applications, and many elements of the Small Basic language. Numerous examples are used to demonstrate every step in the building process. The tutorial also includes several detailed computer programs to illustrate the fun of Small Basic programming. Finished programs can even be published online to share programs with others. The last chapter of the tutorial shows you the source code for four of David H. Ahl's classic Small Basic Computer Games ported into several different computer programming languages including BASIC, Microsoft Small Basic, Visual Basic, Visual C, and Java. No programming experience is necessary, but familiarity with doing common tasks using a computer operating system, simple editing, file maintenance, understanding directory structures, working on the Internet, is expected. The course requires Windows 7, XP, or Vista, ability to view and print documents saved in Microsoft Word format, and the Microsoft Small Basic development environment, Version 0.9 or higher.
