Case Studies In Spatial Point Process Modeling:

Case Studies in Spatial Point Process Modeling Adrian Baddeley, Pablo Gregori, Jorge Mateu Mahiques, Radu Stoica, Dietrich Stoyan, 2006-03-03 Point process statistics is successfully used in fields such as material science human epidemiology social sciences animal epidemiology biology and seismology Its further application depends greatly on good software and instructive case studies that show the way to successful work This book satisfies this need by a presentation of the spatstat package and many statistical examples Researchers spatial statisticians and scientists from biology geosciences materials sciences and other fields will use this book as a helpful guide to the application of point process statistics No other book presents so many well founded point process case studies From the reviews For those interested in analyzing their spatial data the wide variety of examples and approaches here give a good idea of the possibilities and suggest reasonable paths to explore Michael Sherman for the Journal of the American Statistical Association December 2006 *Statistics for Spatio-Temporal Data* Noel Cressie, Christopher K. Wikle, 2011-04-12 Winner of the 2013 DeGroot Prize A state of the art presentation of spatio temporal processes bridging classic ideas with modern hierarchical statistical modeling concepts and the latest computational methods Noel Cressie and Christopher K Wikle are also winners of the 2011 PROSE Award in the Mathematics category for the book *Statistics for Spatio Temporal Data* 2011 published by John Wiley and Sons The PROSE awards for Professional and Scholarly Excellence are given by the Association of American Publishers the national trade association of the US book publishing industry *Statistics for Spatio Temporal Data* has now been reprinted with small corrections to the text and the bibliography The overall content and pagination of the new printing remains the same the difference comes in the form of corrections to typographical errors editing of incomplete and missing references and some updated spatio temporal interpretations From understanding environmental processes and climate trends to developing new technologies for mapping public health data and the spread of invasive species there is a high demand for statistical analyses of data that take spatial temporal and spatio temporal information into account *Statistics for Spatio Temporal Data* presents a systematic approach to key quantitative techniques that incorporate the latest advances in statistical computing as well as hierarchical particularly Bayesian statistical modeling with an emphasis on dynamical spatio temporal models Cressie and Wikle supply a unique presentation that incorporates ideas from the areas of time series and spatial statistics as well as stochastic processes Beginning with separate treatments of temporal data and spatial data the book combines these concepts to discuss spatio temporal statistical methods for understanding complex processes Topics of coverage include Exploratory methods for spatio temporal data including visualization spectral analysis empirical orthogonal function analysis and LISAs Spatio temporal covariance functions spatio temporal kriging and time series of spatial processes Development of hierarchical dynamical spatio temporal models DSTMs with discussion of linear and nonlinear DSTMs and computational algorithms for their implementation Quantifying and exploring spatio temporal variability in scientific applications including

case studies based on real world environmental data Throughout the book interesting applications demonstrate the relevance of the presented concepts Vivid full color graphics emphasize the visual nature of the topic and a related FTP site contains supplementary material Statistics for Spatio Temporal Data is an excellent book for a graduate level course on spatio temporal statistics It is also a valuable reference for researchers and practitioners in the fields of applied mathematics engineering and the environmental and health sciences Advances in Nuclear Architecture Niall M.
