Computer Graphics Programming Günter Enderle, Klaus Kansy, Günther Pfaff, 2012-12-06 TO COMPUTER GRAPHICS BASED ON GKS Part I gives an introduction to basic concepts of computer graphics and to the principles and concepts of GKS The aims of this part are twofold to provide the beginner with an overview of the terminology and concepts of computer graphics based on GKS and to give the computer graphics expert an introduction to the GKS standard In the early chapters of this part the main areas of computer graphics the various classes of computer graphics users the interfaces of GKS and its underlying design concepts are discussed and important terms are defined The later chapters give an informal introduction to the main concepts of GKS and their interrelationships output attributes coordinate systems transformations input segments metafile state lists and error handling This introduction to the GKS framework will prepare the ground for the detailed description of 2D GKS functions in Part III and the 3D extensions to GKS in Part IV

1 WHAT IS COMPUTER GRAPHICS

1.1 Definition of Computer Graphics The Data Processing Vocabulary of the International Organization for Standardization ISO ISO 84 defines Computer Graphics as follows Methods and techniques for converting data to and from a graphic display via computer This definition refers to three basic components of any computer graphics system namely data computer and display

Product Data Interfaces in CAD/CAM Applications J. Encarnacao,R. Schuster,E. Vöge,2012-12-06 Interest in product data exchange and interfaces in the CAD CAM area is steadily growing The rapidly increasing graphics applications in engineering and science has led to a great variety of heterogeneous hardware and software products This has become a major obstacle in the progress of systems integration To improve this situation CAD CAM users have called for specification and implementation of standardized product data interfaces These needs resulted in the definition of preliminary standards in this area Since 1975 activities have been concentrated on developing standards for three major areas computer graphics sculptured surfaces and data exchange for engineering drawings The Graphical Kernel System GKS has been accepted as an international standard for graphics programming in 1984 Y14 26M IGES was adopted as an American Standard in 1981 and the VDA Surface Interface VDAFS has been accepted by the German National Standardization Institute DIN NAM 96 4 Although considerable progress has

been achieved the complexity of the subject and the dynamics of the CAD CAM development still calls for more generality and compatibility of the interfaces This has resulted in an inter national discussion on further improvements of the standards The major goal of this book is to bring together the different views and experiences in industry and university in the area of Product Data Interfaces thereby contributing to the ongoing work in improving the state of the art Computer Graphics and Geometric Modeling: Implementation and algorithms Max K.
