Lee, 2008-12-15 Programming Languages An Active Learning Approach introduces students to three programming paradigms object oriented imperative languages using C and Ruby functional languages using Standard ML and logic programming using Prolog This interactive textbook is intended to be used in and outside of class Each chapter follows a pattern of presenting a topic followed by a practice exercise or exercises that encourage students to try what they

have just read This textbook is best suited for students with a 2 3 course introduction to imperative programming Key Features 1 Accessible structure guides the student through various programming languages 2 Seamlessly integrated practice exercises 3 Classroom tested 4 Online support materials Advance praise The Programming Languages book market is overflowing with books but none like this In many ways it is precisely the book I have been searching for to use in my own programming languages course One of the main challenges I perpetually face is how to teach students to program in functional and logical languages but also how to teach them about compilers This book melds the two approaches very well

David Musicant Carleton College **Active Learning to Minimize the Possible Risk of Future Epidemics** KC Santosh,Suprim Nakarmi,2023-11-22 Future epidemics are inevitable and it takes months and even years to collect fully annotated data The sheer magnitude of data required for machine learning algorithms spanning both shallow and deep structures raises a fundamental question how big data is big enough to effectively tackle future epidemics In this context active learning often referred to as human or expert in the loop learning becomes imperative enabling machines to commence learning from day one with minimal labeled data In unsupervised learning the focus shifts toward constructing advanced machine learning models like deep structured networks that autonomously learn over time with human or expert intervention only when errors occur and for limited data a process we term mentoring In the context of Covid 19 this book explores the use of deep features to classify data into two clusters 0 1 Covid 19 non Covid 19 across three distinct datasets cough sound Computed Tomography CT scan and chest x ray CXR Not to be confused our primary objective is to provide a strong assertion on how active learning could potentially be used to predict disease from any upcoming epidemics Upon request education training purpose GitHub source codes are provided **Analysis Of Algorithms An Active Learning**
