## Constructs Two:

**Green Initiatives for Business Sustainability and Value Creation** Paul, Arun Kumar, Bhattacharyya, Dipak Kumar, Anand, Sandip, 2017-06-19 Sustainability has become an unavoidable topic in modern society. In order for sustainable development to be fully achieved, it must be integrated into the planning and measurement systems of business enterprises. *Green Initiatives for Business Sustainability and Value Creation* is an essential reference source including the most recent scholarly research on the development and application of green business models for contemporary organizations with a focus on possible contexts and constructs of closed loop supply chain management. Featuring extensive coverage on topics such as consumption behavior, political economy, and structural modeling, this book is ideally designed for academicians, researchers, and professionals seeking current research on the importance of strategic green business practices. *The Oxford Handbook of Personality and Psychopathology Assessment* Joni L. Mihura, 2025 In this second edition of the Oxford Handbook of Personality Assessment, now titled *The Oxford Handbook of Personality and Psychopathology Assessment*, Joni L. Mihura brings together a respected group of international contributors to cover significant changes within the field of personality assessment. The Handbook is updated to cover a range of topics focusing on four major goals: to integrate contemporary dimensional models of personality and psychopathology; to use a multimethod approach in which the method of assessment shapes the desired construct; to integrate collaborative therapeutic assessment (CTA) when possible; and to consider personality and psychopathology assessment through the lens of human diversity. *Inter-organizational information exchange, supply chain compliance and performance* Guangqian Peng, 2023-09-04 Globalization of business markets and the rapid development of information technology are making information management more and more important. By combining managerial and economic theory, this book builds a framework to demonstrate facilitating factors for inter-organizational information exchange and the effects of information exchange on supply chain compliance and business performance. We have strong indications, both theoretical and empirical, that such an integrative conceptual framework is needed to grasp the complexity of information exchange between business partners. Using empirical evidence from the poultry chain in Mainland China, this book supports the complementary roles between contractual governance and trust in the process of improving the willingness to communicate. It also proposes that communication quality needs to be broader than information quality. Finally, it illustrates that in order to stand out from main competitors, companies should not only commit to realizing more potential communication benefits for themselves but also for their main partners. Different solutions for buyers and suppliers in optimizing their business performance are also discussed. This book is recommended for a broad audience of professionals, practitioners, and policy makers who concern themselves with information management, supply chain management, channel relationship management, and performance management. **Mount St. Helens National Volcanic Monument**, 1984 *Classroom Collaboration* Phillida Salmon, Hilary Claire, 2020-03-09 Originally published in 1984, this is an account of a two

year study of four comprehensive school classrooms where teachers were fostering collaborative learning methods The authors draw on their joint knowledge and experience as a psychologist and a teacher to give an insight into pupils perceptions of their schooling and a dynamic analysis of the process of education that they experienced Working on the premise that successful collaboration demands common goals and mutual understanding the author observed pupils at work transcribed their talk and carried out interviews with both pupils and their teachers They show how individual children can support and learn from each other document the social and psychological features underlying the use or non use of collaboration and take the teachers own frames of reference as a standpoint in evaluating success The authors findings were intended to encourage teachers to move away from the traditional view of education as the transmission of knowledge to passive pupils Social relationships within the classroom can potentially be not merely a source of disruption but the basis of learning itself This possibility is particularly significant in the context of inner city schools where there is often mutual mistrust and hostility across lines of race class gender or ability
