can we draw from the failures and successes in web based efforts to share structure Chapter 9 PIM Transformed and Transforming Stories from the Past Present and Future Part 2 concludes with a comparison between Licklider's world of information in 1957 and our own world of information today And then we consider what the world of information is likely to look like in 2057 Licklider estimated that he spent 85% of his thinking time in activities that were clerical and mechanical and might someday be delegated to the computer What percentage of our own time is spent with the clerical and mechanical What about in 2057

**The North Korean Economy** Nicholas Eberstadt, 2017-09-04 Viewed from afar North Korea may appear bizarre or positively irrational But as Nicholas Eberstadt demonstrates in this meticulously researched volume there is a grim coherence to North Korea's political economy and a ruthless logic undergirding it one that unreservedly subordinates economic welfare to augmentation of political power Thus paradoxically even as official policies and practices consign the DPRK economy to a perilous realm between crisis and catastrophe the country's leadership maintains unchallenged domestic control and has actually managed to increase its international influence Through painstaking collection of hard to uncover data and careful analysis Eberstadt provides a quantitative tableau of North Korea's terrible failure in its economic race against South Korea its stubborn adherence to policies all but guaranteed to stifle growth and undermine economic performance and the longstanding official effort to ignore or mitigate pressures for economic reform Eberstadt is skeptical of

optimistic accounts from South Korea and elsewhere suggesting that the North Korean leadership is interested in resolving the current nuclear impasse and getting on with the business of reform and development So long as Pyongyang s rulers entertain the ambition of reunifying the Korean peninsula on its own terms Eberstadt argues economic reforms worthy of the name will be subversive of state authority and vigilantly resisted by Pyongyang s rulers This authoritative volume has received widespread attention from Asian specialists well as those concerned with nuclear proliferation and world peace and international relations professionals in general
