

# Which Car Brands Make the Best Vehicles?

We ranked 32 brands based on the Overall Scores of their models, which include road tests, reliability, satisfaction, and safety

By Jeff S. Bartlett and Anita Lam  
February 16, 2023

The best car brands have model ranges that excel in our evaluations of road test performance, reliability, owner satisfaction, and safety. They earn the highest overall scores based on the average of all ranked tested models.

BMW, Volvo, Lexus, and Honda routinely lead the way in our evaluations of road test scores, but their top models in their highest vehicles. BMW earned the top spot this year thanks to especially strong road test performance and solid owner review results.

Volvo leads the league in our safety tests, while Honda is recognized for its reliability. Subaru finished in place in the strength of reliability and owner review scores. The Chevrolet Silverado pickup series, topped third in the well-known average reliability of the full-line model range. Brands with the lowest, like Chrysler, are subject to significant year-to-year shifts.

The rankings can be helpful in choosing by highlighting brands that deliver the most and those that should be approached with more caution. The brands that lead in the road test or those that lead in all areas in our road test and safety with reliability. This one will offer good overall and consistency across their model range, and buyers should be sure.

To be included in the brand ranking, a car must have passed at least two road test models from a brand like, Chevrolet, Ford, Honda, and Toyota aren't included in our rankings this year for the same.

**How We Rank the Car Brands**

The overall scores for individual models based on our five-year data for the road test, reliability, owner satisfaction, and safety.

For the road test scores, we use subjective driving scores from 30 tests and evaluations.

**Product reliability** ratings are based on problems reported by owners in 12 months across 100,000 annual sales figures.

**Owner satisfaction** predictions are based on whether 100,000 owners said we would buy the brand again or not again if given the choice.

**Safety** predictions are measured if any available crash test results and ratings are assigned to vehicles that were equipped with available safety features.

**Value** (based on the lowest price of a brand's 10 most reliable cars for the top 100 models) is the top 10 percent of reliability for the lowest reliability, according to the EPA.
