

Corrosion

- ❑ Corrosion specifically refers to any process involving the deterioration or degradation of metal components.
- ❑ The best known case is that of the rusting of steel.
- ❑ Corrosion processes are usually electrochemical in nature.
- ❑ When metal atoms are exposed to an environment containing water molecules they can give up electrons, becoming themselves positively charged ions, provided an electrical circuit can be completed.

Evans, 1950 *An Introduction to Corrosion and Protection of Metals* Gösta Wranglén, 1972 **An Introduction to Corrosion and Protection of Metals** Gosta Wranglen, 1985-05-15 Corrosion may be defined as an unintentional attack on a material through reaction with a surrounding medium The term can refer to a process or to the damage caused by such a process According to this general definition materials other than metals such as ceramics plastics or concrete may also be subject to corrosion or corrode When no particular reference is made to the material however it is normally understood that a metal is being attacked It is entirely in this limited sense that the term is used in this book There are good reasons for treating the corrosion of metals separately apart from deterioration or decay of other materials Since metals have a high electric conductivity their corrosion is usually of an electrochemical nature The chemical deterioration of electrically non conducting materials such as plastics and ceramics is governed by other physico chemical principles It is necessary to devote more attention to metallic corrosion nowadays than earlier due to 1 An increased use of metals within all fields of technology 2 The use for special applications e g within the atomic energy field of rare and expensive metals whose preservation requires particular precautions 3 A more corrosive environment due to the increasing pollution of air and water 4 The use of metallic constructions of more slender dimensions which do not tolerate corrosive attacks to the same extent as did the heavy constructions used in the old days
