Gnanamanickam,2007-09-29 The idea of developing a comprehensive volume on PLANT ASSOCIATED BACTERIA was born in my mind about 5 years back I decided therefore that the proposed volume on Plant Associated Bacteria will be a complete volume on plant bacteriology There are several books on symbiotic and beneficial bacteria There are also books and volumes on plant pathogenic bacteria In recent years the plant growth promoting rhizobacteria PGPR has emerged as an important group which has significant applications to crop production and biological disease control There is a vital need for a comprehensive volume on all plant associated bacteria that also includes epiphytic and endophytic bacteria In my mind the proposal appeared worthwhile and timely In the present era of genomics there has been an enhanced interest in the genomics of the plant associated bacteria Example the Plant Associated Microbe Genome Initiative American Phytopathological Society [www.apsnet.org/media/ps/top.asp](http://www.apsnet.org/media/ps/top.asp) Traditional methods of identification of bacteria have been replaced by molecular methods for diagnostics and their phylogeny This volume tries to carefully document both the traditional and recent methods To achieve this the contributors have been chosen from among the best experts to provide updated information for a reader who has specific expectations in a volume of this nature
