

TEXTUAL ANALYSIS

Textual analysis is a method used to interpret and understand written or spoken language to gain an understanding of meanings produced through text.

OVERVIEW

Textual analysis involves examining the structure, content, and context of a text to uncover its underlying meanings, themes, and patterns. This process typically involves identifying key ideas, analyzing the rhetorical strategies employed, and considering the cultural, historical, and social factors that may have influenced the text's creation.

EXAMPLE

- **Analysis of policy documents:** A scholar could analyze the policy documents of public companies to determine the evolving ways in which they approach, define, and prioritize Environmental and Social Responsibility as a key value of the companies. This could involve methods like thematic coding and word frequency analysis.
