The Computer Graphics Interface - the Next International Standard Karla Steinbrugge Chauveau, Janet Chin, Special Interest Group on Computer Graphics, 1989 *CGM and CGI* David B. Arnold, Peter R. Bono, 2012-12-06 We have written this book principally for users and practitioners of computer graphics In particular system designers independent software vendors graphics system implementers and application program developers need to understand the basic standards being put in place at the so called Virtual Device Interface and how they relate to other industry standards both formal and de facto Secondly the book has been targetted at technical managers and advanced students who need some understanding of the graphics standards and how they fit together along with a good overview of the Computer Graphics Interface CGI proposal and Computer Graphics Metafile CGM standard in particular Part I Chapters 1 2 and 3 Part II Chapters 10 and 11 Part III Chapters 15 16 and 17 and some of the Appendices will be of special interest Finally these same sections will interest users in government and industry who are responsible for selecting buying and installing commercial implementations of the standards The CGM is already a US Federal Information Processing Standard FIPS 126 and we expect the same status for the CGI when its development is completed and it receives formal approval by the standards making bodies

development and applications in computer graphics have dramatically expanded in recent years. Because of decreasing prices, superior hardware is now being used and image quality is better than ever. Many people now require image synthesis techniques and software for their applications. Moreover, the techniques of computer animation have become very popular. In this book, we present a wide range of applications of computer graphics. This book is a collection of 44 papers in various areas of computer graphics selected from papers presented at Graphics Interface '85. Graphics Interface '85, held from May 27 to 31 in Montreal, was the first truly international computer graphics conference in Canada. This year, for the first time, the conference was presented jointly by the Computer Graphics Society and the Canadian Man-Computer Communications Society. This new arrangement gave the conference international scope. The conference was sponsored by the Department of Communications in Ottawa, the Department of Science and Technology in Quebec, Supply and Services Canada, the Natural Sciences and Engineering Research Council of Canada, Hydro-Quebec, the Association Canadienne Française pour l'Avancement des Sciences, and the Canadian Broadcasting Corporation. Graphics Interface '85 was organized by the École des Hautes Études Commerciales of the University of Montreal. Over 100 papers were submitted to the conference, but 64 were selected by the international program committee for presentation. This book contains new, expanded versions of the papers.
