Singularities at the Threshold Bruno Gullì, 2020-11-12 In *Singularities at the Threshold* The Ontology of Unrest Bruno Gullì calls into question the concept of the independent and sovereign individual of the liberal and neoliberal tradition from the standpoint of the ontology of singularity that is the plural constitution of what appears to be an individual Singularity is not the result of a process of individuation but the process itself He argues that the process of individuation whereby at each stage everything appears to be individuated as such to be an individual thing is in reality always already plural a process of transindividuation or better transdividuation Gullì further examines why singularity is usually confused with individuality what comes after the sovereign and independent individual after the subject and what the role of subversive and liberated singularities is in bringing about a new ethos and a better world
